

#### HEIDELBERG MAN

Built from a jaw bone that was conceded by many to be quite human.

#### NEBRASKA MAN

Scientifically built up from one tooth and later found to be the tooth of an extinct pig.

#### PILTDOWN MAN

The jawbone turned out to belong to a modern ape.

#### PEKING MAN

500,000 years old. All evidence has disappeared.

#### NEANDERTHAL MAN

At the int'l Congress of Zoology (1958) Dr. A. J. E. Cave said his examination showed that the famous Neanderthal skeleton found in France over 50 years ago is that of an old man who suffered from arthritis.

#### NEW GUINEA MAN

Dates away back to 1970 . . . This species has been found in the region just north of Australia.

#### CRO-MAGNON MAN

One of the earliest and best established fossils is at least equal in physique and brain capacity to modern man . . . so what's the difference?

#### MODERN MAN

This genius thinks we came from a monkey.

Professing themselves to be wise they became fools.

## Evolution Of Man After Darwin V2:

Mortimer J. Adler, 2009-08-01 In this classic work Adler explores how man differs from all other things in the universe bringing to bear both philosophical insight and informed scientific hypotheses concerning the biological and behavioral characteristics of mankind Rapid advances in science and technology and the abstract concepts of that influence on man and human value systems are lucidly outlined by Adler as he touches on the effect of industrialization and the clash of cultures and value systems brought about by increased communication between previously isolated groups of people Among the other problems this study addresses are the scientific achievements in biology and physics which have raised fundamental questions about humanity's essential nature especially the discoveries in the biological relatedness of all living things Thrown into high relief is humanity's struggle to determine its unique status in the natural world and its value in the world it has created Ultimately Adler's work develops an approach to the separation between scientific and philosophical questions which stands as a model of thought on philosophical considerations of new scientific discoveries and its consequences for the human person

*Aesthetics after Darwin* Winfried Menninghaus, 2019-12-10 Darwin famously proposed that sexual competition and courtship is or at least was the driving force of art production not only in animals but also in humans The present book is the first to reveal that Darwin's hypothesis rather than amounting to a full blown antidote to the humanist tradition is actually strongly informed both by classical rhetoric and by English and German philosophical aesthetics thereby Darwin's theory far richer and more interesting for the understanding of poetry and song The book also discusses how the three most discussed hypothetical functions of the human arts competition for attention and loving acceptance social cooperation and self enhancement are not mutually exclusive but can well be conceived of as different aspects of the same processes of producing and responding to the arts Finally reviewing the current state of archeological findings the book advocates a new hypothesis on the multiple origins of the human arts posing that they arose as new variants of human behavior when three ancient and largely independent adaptations sensory and sexual selection driven biases regarding visual and auditory beauty play behavior and technology joined forces with and were transformed by the human capacities for symbolic cognition and language
