## **Evolution Of U S Army Nuclear Doctrine 1945 1980:**

The Evolution of U.S. Army Nuclear Doctrine, 1945-1980 John P. Rose, 2019 The development of U S Army nuclear doctrine policies plans procedures tactics and techniques since World War II its impact on Army forces and its role in future wars is the subject of this policy oriented analysis The definition of Army nuclear doctrine advanced by the author clearly implies a distinction between policy for the employment of nuclear weapons as determined by the president and the role adduced by the Army Dr Rose suggests that developments both nuclear and conventional in U S Army tactical doctrine have been more responsive to political preferences held by national authorities than to the real nature of the potential threat and rigors of the nuclear battlefield Further he argues that the type of war preparations favored by U S political authorities over the last fifteen years and the type of war for which the Soviet Union is preparing differ markedly making the U S Army poorly prepared for a major war *The Echo of Battle* Brian McAllister Linn, 2009-07-01 Wars have defined the U S But after the guns fall silent the army searches the lessons of past conflicts developing the strategies weapons doctrines and commanders that it hopes will guarantee future victory Linn surveys the past assumptions and errors that underlie the army s many visions of warfare up to the present day American War Plans, 1945-1950 Steven T. Ross, 1996 This account provides a fascinating in depth view of what might have happened had the two superpowers attempted to settle their differences by force Maneuver and Fire Power: The Evolution of Divisions and Separate Brigades ( Cloth Edition format only) John B. Wilson, 1999-01-20 CMH 60 14 Army Lineage Series Traces the evolution of divisions and brigades in the United States Army Gives a systematic account of the way these two organizations evolved highlighting the rationales behind that evolution and the many factors that played a part in bringing those changes into reality L C card 94 21031 **Conventional Deterrence** John J. Mearsheimer, 1985-08-21 Conventional Deterrence is a book about the origins of war Why do nations faced with the prospect of large scale conventional war opt for or against an offensive strategy John J Mearsheimer examines a number of crises that led to major conventional wars to explain why deterrence failed He focuses first on Allied and German decision making in the years 1939 1940 analyzing why the Allies did not strike first against Germany after declaring war and conversely why the Germans did attack the West Turning to the Middle East he examines the differences in Israeli and Egyptian strategic doctrines prior to the start of the major conventional conflicts in that region Mearsheimer then critically assays the relative strengths and weaknesses of NATO and the Warsaw Pact to determine the prospects for conventional deterrence in any future crisis He is also concerned with examining such relatively technical issues as the impact of precision guided munitions PGM on conventional deterrence and the debate over maneuver versus attrition warfare Mearsheimer pays considerable attention to questions of military strategy and tactics Challenging the claim that conventional detrrrence is largely a function of the numerical balance of forces he also takes issue with the school of thought that ascribes deterrence failures to the dominance of offensive weaponry In addition to examining the military consideration underlying deterrence he

also analyzes the interaction between those military factors and the broader political considerations that move a nation to war

*The Nixon Administration and the Making of U.S. Nuclear Strategy* Terry Terriff, 2018-05-31 In 1974 Richard Nixon's defense secretary James Schlesinger announced that the United States would change its nuclear targeting policy from assured destruction to limited nuclear options In this account of the Schlesinger Doctrine based on newly declassified documents and extensive interviews with key actors Terry Terriff challenges the Nixon administration's official explanation of why and how this policy innovation occurred

**Parameters**, 1981 [History of Acquisition in the Department of Defense, Volume 1](#) Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman's tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look's stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs

strategic nuclear weapons The U S also required European missile bases to deploy their intermediate range ballistic missiles while efforts continued to develop U S based intercontinental ballistic missiles Deploying such missiles to Europe required balancing regional European concerns with U S domestic security priorities In the wake of the Soviet Sputnik launch in 1957 the U S began to fear Soviet missile capabilities Using European missile bases would mitigate this domestic security issue but convincing NATO allies to base the missiles in their countries raised issues of sovereignty and weapons control and ran the risk of creating divisions in the NATO alliance **Armed Forces** ,1982 **Professional Journal of the United States Army** ,1981 **A Companion to Dwight D.
