H. Stumpf, Carsten Wiuf, 2010 Networks provide a very useful way to describe a wide range of different data types in biology physics and elsewhere Apart from providing a convenient tool to visualize highly dependent data networks allow stringent mathematical and statistical analysis In recent years much progress has been achieved to interpret various types of biological network data such as transcriptomic metabolomic and protein interaction data as well as epidemiological data Of particular interest is to understand the organization complexity and dynamics of biological networks and how these are influenced by network evolution and functionality This book reviews and explores statistical mathematical and evolutionary theory and tools in the understanding of biological networks The book is divided into comprehensive and self contained chapters each of which focuses on an important biological network type explains concepts and theory and illustrates how these can be used to obtain insight into biologically relevant processes and questions There are chapters covering metabolic transcriptomic protein interaction and epidemiological networks as well as chapters that deal with theoretical and conceptual material The authors who contribute to the book are active highly regarded and well known in the network community Sample Chapter s Chapter 1 A Network Analysis Primer 350 KB Contents A Network Analysis Primer M P H Stumpf Evolutionary Analysis of Protein Interaction Networks C Wiuf Motifs in Biological Networks F Schreiber Bayesian Analysis of Biological Networks Clusters Motifs Cross Species Correlations J Berg Network Concepts and Epidemiological Models R R Kao Evolutionary Origin and Consequences of Design Properties of Metabolic Networks T Pfeiffer Protein Interactions from an Evolutionary Perspective F Pazos Statistical Null Models for Biological Network Analysis W P Kelly et al Readership Academics researchers postgraduates and advanced undergraduates in bioinformatics Biologists mathematicians statisticians physicists and computer scientists *Bayesian Evolutionary Analysis with BEAST* Alexei J.
