Knorr, H. Strasser, H.G. Zilian, 2012-12-06 This book constitutes the outcome of an international conference held at the Otto Mobes Volkswirtschaftsschule Graz Stifting Austria from June 16 to 22 1974 The conference was initiated by a project group

working on determinants and controls of social science development at the Institute for Advanced Studies and Scientific Research in Vienna and organized by the editors of this volume. It was held under the auspices of the Austrian Ministry of Science and Research. The main topics of the conference were those at the forefront of the state of argumentation to borrow from one of our contributors in philosophy and sociology of science ever since the controversy between Thomas S. Kuhn and Sir Karl R. Popper has sharpened our awareness for the methodological and substantial presuppositions involved with questions of growth and development in science. Let us give two examples of those topics. The borderline between sociology of science and philosophy of science has become more and more unclear while the work of at least some philosophers of science comes to have an empirical flavour. Sociologists of science are increasingly apt to include logical and methodological components of the research process as their objects of examination. Papers included in this volume testify to both tendencies.

Cornerstones of Attachment Research Robbie Duschinsky, 2020. Attachment theory is among the most popular theories of human socioemotional development with a global research community and widespread interest. This book re-examines the work of key laboratories that have contributed to the study of attachment along with the individuals who have contributed to its intellectual development.

Reticulate Evolution and Humans Michael L. Arnold, 2009. This book describes the important role that the transfer of genes between organisms has played during the origin and evolution of humans and the evolution of organisms on which the human species depends for shelter, sustenance and companionship.

*Research and Development in Intelligent Systems XXV* Frans Coenen, Miltos Petridis, 2010-05-28. The papers in this volume are the refereed technical papers presented at AI 2008, the Twenty-eighth SGAI International Conference on Innovative Techniques and Applications of Artificial Intelligence held in Cambridge in December 2008. They present new and innovative developments in the field divided into sections on CBR and Classification, AI Techniques, Argumentation and Negotiation, Intelligent Systems, From Machine Learning To E-Learning and Decision Making. The volume also includes the text of short papers presented as posters at the conference. This is the twenty-fifth volume in the Research and Development series.
