eminent contributors from around the world **Evolutionary Perspectives on Human Sexual Psychology and Behavior**

Viviana A. Weekes-Shackelford, Todd K. Shackelford, 2014-07-08 This volume in the Springer Series in Evolutionary Psychology presents a state of the art view of the topic of sexuality and sexual behavior drawing on theoretical constructs and research of noted individuals in the field Comprehensive and multi disciplinary this book seeks to provide a broad overview without sacrificing the complexity of a multi faceted approach The book is framed by introductory and closing sections that provide a context for the range of ideas contained within Ample space is provided in designated sections that focus on key areas of sexuality from both male and female perspectives and that include information from primate studies This volume can serve as a graduate text in sexual behavior in evolutionary terms and as a guide for further research

Explorations in Neuroscience, Psychology and Religion Kevin S. Seybold, 2016-04-15 In the 1990s great strides were taken in clarifying how the brain is involved in behaviors that in the past had seldom been studied by neuroscientists or psychologists This book explores the progress begun during that momentous decade in understanding why we behave think and feel the way we do especially in those areas that interface with religion What is happening in the brain when we have a religious experience Is the soul a product of the mind which is in turn a product of the brain If so what are the implications for the Christian belief in an afterlife If God created humans for the purpose of having a relationship with him should we expect to find that our spirituality is a biologically evolved human trait What effect might a disease such as Alzheimer s have on a person s spirituality and relationship with God Neuroscience and psychology are providing information relevant to each of these questions and many Christians are worried that their religious beliefs are being threatened by this research Kevin Seybold attempts to put their concerns to rest by presenting some of the scientific findings coming from these disciplines in a way that is understandable yet non threatening to Christian belief Evolutionary Perspectives on Environmental Problems

Iver Mysterud, 2017-07-05 The twenty first century presents an increasing number of environmental problems including toxic pollution global warming destruction of tropical forests extinction of biological diversity and depletion of natural resources These environmental problems are generally due to human behavior namely over consumption of resources and overpopulation Designing effective policies to address these problems requires a deep understanding of human behavior as well as ecology This in turn requires considerations of human nature and the evolutionary design of the human mind Evolutionary research on human behavior has profound implications for the environmental sciences The aim of this collection is to bring together a variety of chapters that show how and why Part 1 Human Nature and Resource Conservation addresses environmental problems from different evolutionary perspectives Part 2 The Ecological Noble Savage Hypothesis examines the notion that our environmental problems are due to Western culture and that our ancestors and people in indigenous societies lived in harmony with nature until the corrupting influences of Western culture Part 3 The Tragedy of the Commons explores the conservation of common pool or open access natural resources such as fisheries forests grazing lands

freshwater and clean air Part 4 The Evolution of Discounting and Conspicuous Consumption looks at the problem of explaining why people are so ecologically short sighted and why people in developed countries consume so many resources Part 5 Overpopulation and Fertility Declines addresses the evolution of human reproductive decisions Part 6 Biophilia aims to explain why people cherish nature as well as destroy it The goal of this volume is to introduce environmental thinkers to evolutionary perspectives on human behavior and the new interdisciplinary sciences of evolutionary psychology and behavioral ecology This reader aims to help bridge
