Evolutionary Anthropology:

Innovation in Cultural Systems Michael John O'Brien, Stephen Shennan, 2010 Leading scholars offer a range of perspectives on the roles played by innovation in the evolution of human culture In recent years an interest in applying the principles of evolution to the study of culture emerged in the social sciences Archaeologists and anthropologists reconsidered the role of innovation in particular and have moved toward characterizing innovation in cultural systems not only as a product but also as an evolutionary process This distinction was familiar to biology but new to the social sciences cultural evolutionists from the nineteenth to the twentieth century had tended to see innovation as a preprogrammed change that occurred when a cultural group needed to overcome environmental problems In this volume leading researchers from a variety of disciplines including anthropology archaeology evolutionary biology philosophy and psychology offer their perspectives on cultural innovation The book provides not only a range of views but also an integrated account with the chapters offering an orderly progression of thought The contributors consider innovation in biological terms discussing epistemology animal studies systematics and phylogeny phenotypic plasticity and evolvability and evo devo they discuss modern insights into innovation including simulation the random copying model diffusion and demographic analysis and they offer case studies of innovation from archaeological and ethnographic records examining developmental behavioral and social patterns Contributors Andr Ariew R Alexander Bentley Werner Callebaut Joseph Henrich Anne Kandler Kevin N Laland Daniel O Larson Alex Mesoudi Michael J O'Brien Craig T Palmer Adam Powell Simon M Reader Valentine Roux Chet Savage Michael Brian Schiffer Jeffrey H Schwartz Stephen J Shennan James Steele Mark G Thomas Todd L VanPool The Comparative Approach in Evolutionary Anthropology and Biology Charles L. Nunn, 2011-11-30 And when new fossils are found such as those of the tiny humans of Flores scientists compare these remains to other fossils and contemporary humans

The Primate Fossil Record Walter Carl Hartwig, 2002-04-11 A comprehensive treatment of primate paleontology Profusely illustrated and up to date it captures the complete history of the discovery and interpretation of primate fossils The chapters range from primate origins to the advent of anatomically modern humans Each emphasizes three key components of the record of primate evolution history of discovery taxonomy of the fossils and evolution of the adaptive radiations they represent The Primate Fossil Record summarizes objectively the many intellectual debates surrounding the fossil record and provides a foundation of reference information on the last two decades of astounding discoveries and worldwide field research for physical anthropologists paleontologists and evolutionary biologists *Evolutionary Anthropology* Edward Staski, Jonathan B. Marks, 1992 **Applied Evolutionary Anthropology** Mhairi A. Gibson, David W. Lawson, 2014-03-10 As a species we are currently experiencing dramatic shifts in our lifestyle family structure health and global contact Evolutionary Anthropology provides a powerful theoretical framework to study such changes revealing how current environments and legacies of past selection shape human diversity This book is the first major review of the emerging field of

Applied Evolutionary Anthropology bringing together the work of an international group of evolutionary scientists addressing many of the major public health and social issues of this century Through a series of case studies that span both rural and urban situations in Africa Asia Europe and South America each chapter addresses topics such as natural resource management health service delivery population growth and the emergence of new family structures dietary and co operative behaviours The research presented identifies the great largely untapped potential that Applied Evolutionary Anthropology holds to guide the design implementation and evaluation of effective social and public health policy This book will be of interest to policy makers and applied researchers along with academics and students across the biological and social sciences

Theology and Evolutionary Anthropology Celia Deane-Drummond, Agustín Fuentes, 2020-01-29 This book sets out some of the latest scientific findings around the evolutionary development of religion and faith and then explores their theological implications This unique combination of perspectives raises fascinating questions about the characteristics that are considered integral for a flourishing social and religious life and allows us to start to ask where in the evolutionary record they first show up in a distinctly human manner The book builds a case for connecting theology and evolutionary anthropology using both historical and contemporary sources of knowledge to try and understand the origins of wisdom humility and grace in deep time In the section on wisdom the book examines the origins of complex decision making in humans through the archaeological record recent discoveries in evolutionary anthropology and the philosophical richness of semiotics The book then moves to an exploration of the origin of characteristics integral to the social life of small scale communities which then points in an indirect way to the disposition of humility Finally it investigates the theological dimensions of grace and considers how artefacts left behind in the material record by our human ancestors and the perspective they reflect might inform contemporary concepts of grace This is a cutting edge volume that refuses to commit the errors of either too easy a synthesis or too facile a separation between science and religion As such it will be of interest to scholars of religious studies and theology especially those who interact with scientific fields as well as academics working in anthropology of religion

Evolutionary Anthropology Hermann K. Bleibtreu, 1969 [The Comparative Approach in Evolutionary Anthropology and Biology](#) Charles L. Nunn, 2011-07-05 Comparison is fundamental to evolutionary anthropology When scientists study chimpanzee cognition for example they compare chimp performance on cognitive tasks to the performance of human children on the same tasks And when new fossils are found such as those of the tiny humans of Flores scientists compare these remains to other fossils and contemporary humans Comparison provides a way to draw general inferences about the evolution of traits and therefore has long been the cornerstone of efforts to understand biological and cultural diversity Individual studies of fossilized remains living species or human populations are the essential units of analysis in a comparative study bringing these elements into a broader comparative framework allows the puzzle pieces to fall into place creating a means of testing adaptive hypotheses and generating new ones With this book Charles L Nunn

intends to ensure that evolutionary anthropologists and organismal biologists have the tools to realize the potential of comparative research Nunn provides a wide ranging investigation of the comparative foundations of evolutionary anthropology in past and present research including studies of animal behavior biodiversity linguistic evolution allometry and cross cultural variation He also points the way to the future exploring the new phylogeny based comparative approaches and offering a how to manual for scientists who wish to incorporate these new methods into their research *Evolution in an Anthropological View* C. Loring Brace, 2000 Brace has reworked ten of the many articles he has published on human evolution over the past 40 years and assembled them into a statement on evolutionary anthropology He begins by investigating which anthropological data can benefit from an evolutionary perspective and which cannot Then he explores such topics as Darwinism race cladistics phylogeny Neanderthals dentition and cultural ecology Annotation copyrighted by Book News Inc Portland OR
