Evolutionary Psychology Alternative Approaches:

Evolutionary Psychology Steven J. Scher, Frederick Rauscher, 2012-12-06 Evolutionary psychology has been dominated by one particular method for studying the mind and behavior This is the first book to both question that monopoly and suggest a broad range of particular alternatives Psychologists philosophers biologists anthropologists and others offer different methods for combining psychology and evolution They recommend specific changes to evolutionary psychology using a wide variety of theoretical assumptions In addition some essays analyze the underpinnings of the dominant method relate it to the context of evolutionary and psychological theory and to general philosophy of science and discuss how to test approaches to evolutionary psychology The aim of this collection is not to reject evolutionary psychology but to open up new vistas which students and researchers can use to ensure that evolutionary psychology continues to thrive

Epistemological Dimensions of Evolutionary Psychology Thiemo Breyer, 2014-11-04 As psychology and philosophy arose as answers to the eternal question of how the mind works evolutionary psychology has gained ground over recent years as a link between cognitive behavioral and natural science theories of the mind This provocative field has also gathered a wide range of criticisms from attributing too much autonomy to the brain to basing itself on faulty assumptions about our prehistoric past Epistemological Dimensions of Evolutionary Psychology reframes its discipline for the contemporary era correcting common misconceptions and mediating between different schools of thought By focusing on the nature and limits of knowledge and reasoning the essence of epistemology contributors offer fresh insights at the intersection of human cognitive abilities as adaptations and our self perception of knowledge including evolutionary perspectives on altruism depression or the phasing out of human sacrifice This diversity strengthens and vindicates the field as evinced by thought provoking dispatches such as Toward a cognitive philosophy of science Evolutionary media psychology and its epistemological foundation The meme meme revisited Depression as an adaptation Like me a homophily based account of human culture Preparedness to learn about the world evidence from infant research An engaging and often controversial testament to the combined power of evolution and logic Epistemological Dimensions of Evolutionary Psychology will intrigue philosophers as well as psychologists in a variety of subdisciplines

The SAGE Handbook of Evolutionary Psychology Todd K. Shackelford, 2021-08-04 Evolutionary psychology is an important and rapidly expanding area in the life social and behavioral sciences and this Handbook represents the most comprehensive and up to date reference text in the field today Over three volumes the Handbook provides a rich overview of the most important theoretical and empirical work in the field Chapters cover a broad range of topics including theoretical foundations the integration of evolutionary psychology with other life social and behavioral sciences as well as with the arts and the humanities and the increasing power of evolutionary psychology to inform applied fields including medicine psychiatry law and education Each of the volumes has been carefully curated to have a strong thematic focus covering The foundations of evolutionary psychology The integration of evolutionary

Developing Scaffolds in Evolution, Culture, and Cognition Linnda R. Caporael, James R. Griesemer, William C. Wimsatt, 2014 Empirical and philosophical perspectives on scaffolding that highlight the role of temporal and temporary resources in development across concepts of culture cognition and evolution Scaffolding is a concept that is becoming widely used across disciplines This book investigates common threads in diverse applications of scaffolding including theoretical biology cognitive science social theory science and technology studies and human development Despite its widespread use the concept of scaffolding is often given short shrift the contributors to this volume from a range of disciplines offer a more fully developed analysis of scaffolding that highlights the role of temporal and temporary resources in development broadly conceived across concepts of culture cognition and evolution The book emphasizes reproduction repeated assembly and entrenchment of heterogeneous relations parts and processes as a complement to neo Darwinism in the developmentalist tradition of conceptualizing evolutionary change After describing an integration of theoretical perspectives that can accommodate different levels of analysis and connect various methodologies the book discusses multilevel organization differences and reciprocity between individuals and institutions as units of analysis and perspectives on development that span brains careers corporations and cultural cycles Contributors Colin Allen Linnda R Caporael James Evans Elihu M Gerson Simona Ginsburg James R Griesemer Christophe Heintz Eva Jablonka Sanjay Joshi Shu Chen Li Pamela Lyon Sergio F Martinez Christopher J May Johann Peter Murmann Stuart A Newman Jeffrey C Schank Iddo Tavory Georg Theiner Barbara Hoeberg Wimsatt William C Wimsatt **Human Characteristics** Preben Bertelsen, Henrik Høgh-Olesen, Jan

Tønnesvang,2009-01-23 Every once in a while we have to reconsider the perennial questions concerning human nature What are the special human behaviours social practices and psychological structures that make us particularly human The field of evolution psychology and cognitive science is the most expanding inter disciplinary area of this field for the time being uniting different sciences under the same evolutionary paradigm and keeping them occupied by the same eternal questions stated above Relevant data and theoretical considerations are piling up but an overview is needed To facilitate this a large inter disciplinary conference entitled Human Mind Human Kind was held at Aarhus University Denmark The studies fall into three well defined sections 1 Evolution and Cognition Comparative and Developmental Perspectives 2 Human Sociality Morality and Religiosity 3 Human Sexuality and Mating Strategies Specifying the differences between our own species and the rest of the animal world always provokes debate But these demarcations simply have to be drawn once and again They focus attention and stimulate research exactly because they provoke and challenge other researchers to take up the glove and prove us wrong

Integrating Converging Evidence in Behavioral Sciences Gary L. Brase,2025-09-26 Integrating Converging Evidence in Behavioral Sciences presents a fresh approach to understanding the landscape of scientific research particularly within the behavioral sciences By examining the needs for consistency and coherence across different scientific disciplines this book offers readers a practical framework for evaluating and advancing their research topics Through a comprehensive overview of established frameworks such as Marr s computational framework and Tinbergen s four questions the book introduces a novel convergence framework specifically tailored to the behavioral sciences This approach enables a more integrated view of scientific theories and knowledge empowers researchers to pinpoint areas of high impact and helps them to recognize potential revolutions in the field The book serves a dual purpose As a rubric for students and early career researchers to grasp and navigate their research topics and also as a resource for more advanced researchers seeking to delve into deeper issues and apply the framework across different contexts This book is an essential guide for anyone interested in harmonizing scientific perspectives developing more robust and interconnected fields of research and potentially paving the way for groundbreaking discoveries

The Cognitive Science of Religion James A. Van Slyke, 2016-03-23 The cognitive science of religion is a relatively new academic field in the study of the origins and causes of religious belief and behaviour The focal point of empirical research is the role of basic human cognitive functions in the formation and transmission of religious beliefs However many theologians and religious scholars are concerned that this perspective will reduce and replace explanations based in religious traditions beliefs and values This book attempts to bridge the reductionist divide between science and religion through examination and

critique of different aspects of the cognitive science of religion and offers a conciliatory approach that investigates the multiple causal factors involved in the emergence of religion **Thinking about Religion** A. Smith, 2014-04-08 Thinking about Religion examines cutting edge breakthroughs from across the sciences concluding that religion persists because the mind is primed for faith ready to grasp and fiercely defend beliefs that make sense but defy logic
