envisioning the Contemporary Art Canon Perspectives in a Global World seeks to dissect and interrogate the nature of the
present day art field which has experienced dramatic shifts in the past 50 years In discussions of the canon of art history the
notion of inclusiveness both at the level of rhetoric and as a desired practice is on the rise and gradually replacing talk of
exclusion which dominated critiques of the canon up until two decades ago The art field has dramatically if insufficiently
changed in the half century since the first protests and critiques of the exclusion of others from the art canon With increased
globalization and shifting geopolitics the art field is expanding beyond its Euro American focus as is particularly evident in
the large scale international biennales now held all over the globe Are canons and counter canons still relevant Can they be
re envisioned rather than merely revised Following an introduction that discusses these issues thirteen newly commissioned
essays present case studies of consecration in the contemporary art field and three commissioned discussions present diverse
positions on issues of the canon and consecration processes today This volume will be of interest to instructors and students
