Lavan, William Bowden, 2003 An exploration of theoretical frameworks methodology and field practice

suited to the late antique Mediterranean. Broad themes such as long term change, topography, the economy and social life are covered but in terms of the issues and problems being tackled by scholars of late antiquity. *Late Roman Warlords* Penny MacGeorge, 2002-12-05. *Late Roman Warlords* reconstructs the careers of some of the men who shaped and were shaped by the last quarter century of the Western Empire. There is a need for a new investigation of these warlords based on primary sources and including recent historical debates and theories. The difficult sources for this period have been analysed and translated as necessary to produce a chronological account and relevant archaeological and numismatic evidence has been utilised. An overview of earlier warlords including Aetius is followed by three studies of individual warlords and the regions they dominated. The first covers Dalmatia and Marcellinus its ruler during the 450s and 460s. A major theme is the question of Marcellinus' western or eastern affiliations using an often ignored Greek source. Penny MacGeorge suggests a new interpretation. The second part is concerned with the Gallic general Aegidius and his son Syagrius who ruled in northern Gaul probably from Soissons. This extends to AD 486 well after the fall of the Western Empire. The problem of the existence or non existence of a kingdom of Soissons is discussed introducing evidence from the Merovingian period and a solution put forward. This section also looks at how the political situation in northern Gaul might throw light on contemporary post Roman Britain. The third study is of the barbarian patrician Ricimer defender of Italy and his successors the Burgundian prince Gundobad and Orestes a former employee of Attila down to the coup of 476 by which Odovacer became the first barbarian king of Italy. This includes discussion of the character and motivation of Ricimer particularly in relation to the emperors he promoted and destroyed and of how historians' assessments of him have changed over time. Illyricum in Roman Politics, 229 BC-AD 68 Danijel Dzino, 2010-01-21. This book examines Roman military and political conquest of the Western Balkans. Illyricum between 229 BC and c AD 68 using written and archaeological sources. It shows the various political strategies that the Romans were using in dealing with the indigenous population of the region. Smithsonian Year Smithsonian Institution, 1969. Roman Imperial Architecture John Bryan Ward-Perkins, 1994-01-01. The history of Roman Imperial architecture is one of the interaction of two dominant themes in Rome itself the emergence of a new architecture based on the use of a revolutionary new material Roman concrete and in the provinces the development of interrelated but distinctive Romano provincial schools. The metropolitan school exemplified in the Pantheon the Imperial Baths and the apartment houses of Ostia constitutes Rome's great original contribution. The role of the provinces ranged from the preservation of a lively Hellenistic tradition to the assimilation of ideas from the east and from the military frontiers. It was finally Late Roman architecture that transmitted the heritage of Greece and Rome to the medieval world. **Department of the Interior and Related Agencies Appropriations for 1971** United States.
