Communities and Households in the Greater American Southwest Robert J. Stokes, 2019-07-01 Communities and Households in the Greater American Southwest presents new research on human organization in the American Southwest examining families households and communities in the Ancestral Puebloan Mogollon and Hohokam major cultural areas as well as the Fremont Jornada Mogollon and Lipan Apache areas from the time of earliest habitation to the twenty first century Using historical data dialectic approaches problem oriented and data driven analysis and ethnographic and gender studies methodologies the contributors offer diverse interpretations of what constitutes a site village and community how families and households organized their domestic space and how this organization has influenced researchers interpretations of spatially derived archaeological data Today s archaeologists and anthropologists understand that communities operate as a multi level organizational contextual and referential human creation which informs their understanding of how people actively negotiate their way through and around community constraints The chapters in this book creatively examine these interactions revealing the dynamic nature of ancient and modern groups in the American Southwest The book has two broad complementary themes one focusing on household decision making identity and structural relations with the greater community the other concerned with community organization and integration household roles within the community and changes in community organization violence and destabilization coalescence and cooperation over time Communities and Households in the Greater American Southwest weaves a rich tapestry of ancient and modern life through innovative approaches that will be of interest not only to Southwestern archaeologists but to all researchers and students interested in social organization at the household and community levels Contributors James R Allison Andrew Duff Lindsay Johansson Michael Lindeman Myles Miller James Potter Alison E Rautman J Jefferson Reid Katie Richards Oscar Rodriguez Barbara Roth Kristin Safi Deni Seymour Robert J Stokes Richard K Talbot Scott Ure Henry Wallace Stephanie M Whittlesey

Interaction and Connectivity in the Greater Southwest Karen Harry, Barbara J. Roth, 2019-03-21 This volume of

proceedings from the fourteenth biennial Southwest Symposium explores different kinds of social interaction that occurred prehistorically across the Southwest. The authors use diverse and innovative approaches and a variety of different data sets to examine the economic, social, and ideological implications of the different forms of interaction, presenting new ways to examine how social interaction and connectivity influenced cultural developments in the Southwest. The book observes social interactions' role in the diffusion of ideas and material culture, the way different social units, especially households, interacted within and between communities, and the importance of interaction and interconnectivity in understanding the archaeology of the Southwest's northern periphery. Chapters demonstrate a movement away from strictly economic-driven models of social connectivity and interaction and illustrate that members of social groups lived in dynamic situations that did not always have clear-cut and unwavering boundaries. Social connectivity and interaction were often fluid, changing over time. *Interaction and Connectivity in the Greater Southwest* is an impressive collection of established and up-and-coming Southwestern archaeologists collaborating to strengthen the theoretical underpinnings of the discipline. It will be of interest to professional and academic archaeologists as well as researchers with interests in diffusion, identity, cultural transmission, borders, large-scale interaction, or social organization. This volume investigates the circumstances and conditions under which trade, exchange, direct access, and/or mobility best account for material conveyance across varying distances at different times in the past. ***The Great Basin*** Donald Grayson, 2011-04-18. Covering a large swath of the American West, the Great Basin, centered in Nevada and including parts of California, Utah, and Oregon, is named for the unusual fact that none of its rivers or streams flow into the sea. This fascinating illustrated journey through deep time is the definitive environmental and human history of this beautiful and little-traveled region, home to Death Valley, the Great Salt Lake, Lake Tahoe, and the Bonneville Salt Flats. Donald K. Grayson synthesizes what we now know about the past 25,000 years in the Great Basin: its climate, lakes, glaciers, plants, animals, and peoples, based on information gleaned from the region's exquisite natural archives in such repositories as lake cores, packrat middens, tree rings, and archaeological sites. A perfect guide for students, scholars, travelers, and general readers alike, the book weaves together history, archaeology, botany, geology, biogeography, and other disciplines into one compelling panorama across a truly unique American landscape. *Leaving Mesa Verde* Timothy A. Kohler, Mark D. Varien, Aaron M. Wright, 2013-11-15. It is one of the great mysteries in the archaeology of the Americas: the depopulation of the northern Southwest in the late thirteenth century AD. Considering the

numbers of people affected the distances moved the permanence of the departures the severity of the surrounding conditions and the human suffering and culture change that accompanied them the abrupt conclusion to the farming way of life in this region is one of the greatest disruptions in recorded history Much new paleoenvironmental data and a great deal of archaeological survey and excavation permit the fifteen scientists represented here much greater precision in determining the timing of the depopulation the number of people affected and the ways in which northern Pueblo peoples coped and failed to cope with the rapidly changing environmental and demographic conditions they encountered throughout the 1200s In addition some of the scientists in this volume use models to provide insights into the processes behind the patterns they find helping to narrow the range of plausible explanations What emerges from these investigations is a highly pertinent story of conflict and disruption as a result of climate change environmental degradation social rigidity and conflict Taken as a whole these contributions recognize this era as having witnessed a competition between differing social and economic organizations in which selective migration was considerably hastened by severe climatic environmental and social upheaval Moreover the chapters show that it is at least as true that emigration led to the collapse of the northern Southwest as it is that collapse led to emigration Zooarchaeology in Practice Christina M. Giovas,Michelle J. LeFebvre,2017-11-24

Zooarchaeology in Practice unites depth of treatment with broad topical coverage to advance methodological discussion and development in archaeofaunal analysis Through case studies historical accounts and technical reviews authored by leading figures in the field the volume examines how zooarchaeological data and interpretation are shaped by its methods of practice and explores the impact of these effects at varying levels of investigation Contributing authors draw on geographically and taxonomically diverse datasets providing instructive approaches to problems in traditional and emerging areas of methodological concern Readers from specialists to students will gain an extensive sophisticated look at important disciplinary issues that are sure to provoke critical reflection on the nature and importance of sound methodology With implications for how archaeologists reconstruct human behavior and paleoecology and broader relevance to fields such as paleontology and conservation biology Zooarchaeology in Practice makes an enduring contribution to the methodological advancement of the discipline Utah Archaeology ,2003 Moon Utah W.
