Ecology As Politics:

Ecology as Politics André Gorz, 1980 **Critical Political Ecology** Tim Forsyth, 2003 Describes new ways of looking at environmental science and politics and discusses the problems of formulating and implementing environmental policy particularly in the global arena and in developing countries The Corporate Planet Joshua Karliner, 1997 Citing case histories such as Chevron Shell and Mitsubishi CORPORATE WATCH editor Joshua Karliner brilliantly exposes how transnationals aided by free trade agreements World Bank policies and massive consumer campaigns play central roles in environmental destruction This important and timely book is a significant contribution to the battle against irresponsible corporate behavior **Chicano Culture, Ecology, Politics** Devon G. Peña, 1999-01-01 Until recently mainstream American environmentalism has been a predominantly white middle class movement essentially ignoring the class race and gender dimensions of environmental politics In this provocative collection of original essays the environmental dimensions of the Chicana o experience are explicitly expressed and debated Employing a variety of genres ranging from poetry to autobiography to theoretical and empirical essays the voices in this collection speak to the most significant issues of environmentalism and social justice recognizing throughout the need for a pluralism of Chicana o philosophies The contributors provide an excellent basis for understanding how multiple Chicana o views on the environment play out in the context of dominant social political and economic views Chicano Culture Ecology Politics examines a number of Chicana o ecological perspectives How can the ethics of reciprocity present in Chicana o agropastoral life be protected and applied on a broader scale How can the dominant society whose economic structure is invested in placeless mobility take note of the harm caused to land based cultures take responsibility for it and take heed before it is too late Will the larger society be ecologically housebroken before it destroys its home Grounded in actual political struggles waged by Chicana o communities over issues of environmental destruction cultural genocide and socioeconomic domination this volume provides an important series of snapshots of Chicana o history Chicano Culture Ecology Politics illuminates the bridges that exist and must be understood between race ethnicity class gender politics and ecology CONTENTS Part 1 IndoHispano Land Ethics Los Animalitos Culture Ecology and the Politics of Place in the Upper R o Grande Devon G Pe a Social Action Research Bioregionalism and the Upper R o Grande Rub n O Mart nez Notes on Home Land Ethics Ideas Values and the Land Reyes Garc a Part 2 Environmental History and Ecological Politics Ecological Legitimacy and Cultural Essentialism Hispano Grazing in Northern New Mexico Laura Pulido The Capitalist Tool the Lawless and the Violent A Critique of Recent Southwestern Environmental History Devon G Pe a and Rub n O Mart nez Ecofeminism and Chicano Environmental Struggles Bridges across Gender and Race Gwyn Kirk Philosophy Meets Practice A Critique of Ecofeminism through the Voices of Three Chicana Activists Malia Davis Part 3 Alternatives to Destruction The Pasture Poacher a poem Joseph C Gallegos Acequia Tales Stories from a Chicano Centennial Farm Joseph C Gallegos A Gold Mine an Orchard and an Eleventh

Commandment Devon G Pe a **War on the Land** Bill Weinberg,1991 **Politics of Nature** Bruno Latour,2009-07-01
 This book establishes the conceptual context for political ecology Latour proposes an end to the old dichotomy between nature and society and the constitution in its place of a community incorporating humans and nonhumans and building on the experiences of the sciences as they are actually practiced Ecology, Policy and Politics John O'Neill,2002-11 Revealing flaws in both green and market based approaches to environmental policy O'Neill develops an Aristotelian account of well being He examines the implications for wider issues involving markets civil society and politics in modern society Design, Ecology, Politics Joanna Boehnert,2018-02-08 Design Ecology Politics links social and ecological theory to design theory and practice critiquing the ways in which the design industry perpetuates unsustainable development Boehnert argues that when design does engage with issues of sustainability this engagement remains shallow due to the narrow basis of analysis in design education and theory The situation is made more severe by design cultures which claim to be apolitical Where design education fails to recognise the historical roots of unsustainable practice it reproduces old errors New ecologically informed design methods and tools hold promise only when incorporated into a larger project of political change Design Ecology Politics describes how ecological literacy challenges many central assumptions in design theory and practice By bringing design ecology and socio political theory together Boehnert describes how power is constructed reproduced and obfuscated by design in ways which often cause environmental harms She uses case studies to illustrate how communication design functions to either conceal or reveal the ecological and social impacts of current modes of production The transformative potential of design is dependent on deep reaching analysis of the problems design attempts to address Ecologically literate and critically engaged design is a practice primed to facilitate the creation of viable sustainable and just futures With this approach designers can make sustainability not only possible but attractive **Ecologists and Environmental Politics** Stephen Bocking,Professor Stephen Bocking,1997-01-01 Looks at the history of U S environmental policy *EPA-600/5*,1974-02 **The Politics of Ecology** Aldous Huxley,1970 **Ecology Contested** Peter Staudenmaier,2021-09 In an age of climate crisis and political confusion ecology seems to offer clear answers to urgent questions about the current global predicament Yet ecology has always been politically ambivalent Environmental ideals appeal to radicals and reactionaries alike ecological concerns can align with both the left and the right including the extreme right In Ecology Contested Peter Staudenmaier examines the complex and conflicting politics of environmentalism with a critical eye offering challenging perspectives on the historical philosophical and political dimensions of ecological engagement in a troubled world
 Rethinking Green Politics John Barry,1998-12-15 W J M MacKenzie Prize winner for the best book in Political Science published in 1999 Of the sixteen books submitted some of high quality this one was agreed to be in a class of its own The book breaks new ground in green political theory and in an engaging manner educates those anxious to be good citizens and challenges those responsible for public policy in a highly topical and globally important discourse Barry's immanent critique

his insistence that we build on what there is his resistance to the easy anti statist line his sane and balanced outlook is intellectually brave in this often rather clamant territory The analysis of ecological morality individual stewardship and collective responsibility provides an original and seminal treatise that advances the discipline as a whole Professor Andrew Dunsire *The Violence of the Green Revolution* Vandana Shiva,2016-01-14 The Green Revolution has been heralded as a political and technological achievement unprecedented in human history Yet in the decades that have followed it this supposedly nonviolent revolution has left lands ravaged by violence and ecological scarcity A dedicated empiricist Vandana Shiva takes a magnifying glass to the effects of the Green Revolution in India examining the devastating effects of monoculture and commercial agriculture and revealing the nuanced relationship between ecological destruction and poverty In this classic work the influential activist and scholar also looks to the future as she examines new developments in gene technology **Plato's Revenge** William Ophuls,2011 Provides a wide ranging review of history philosophy science and political economy in search of natural law and objective value by which to replenish the lode of fossil virtue and belief inherited from the premodern era and depleted by modern nihilism **Fugitive Politics** Carl Boggs,2021-11-10 *Fugitive Politics* explores the intersection between politics and ecology between the requirements for radical change and the unprecedented challenges posed by the global crisis a dialectic has rarely been addressed in academia Across eight chapters Carl Boggs explores how systemic change may be achieved within the current system while detailing attempts at achieving change within nation states Boggs states that any notion of revolution seems fanciful in the current climate contending that controlling elites have concentrated their hold on corporate power along three self serving fronts technology Big Tech and the surveillance order militarism and the warfare state and intensification of globalized power Combined with this Boggs cites the fundamental absence of revolutionary counter forces arguing that after decades of subservice relevant allied to the rise of identity politics and social movements the Marxist theoretical legacy is now exhausted and will not provide an exit from the crisis Boggs concludes that the only possibility for fundamental change will come from an open style of politics in the Jacobin tradition operating within the overall structures of the current democratic state Written for both an academic and a general readership in the U S and beyond *Fugitive Politics* will be of vital importance to those studying political theory political philosophy political history Marxism and Marxist theory authoritarian politics ecology environmental politics and climate politics *Decolonizing Nature* T. J. Demos,2016-09-02 A study of the intersecting fields of art history ecology visual culture geography and environmental politics While ecology has received little systematic attention within art history its visibility and significance has grown in relation to the threats of climate change and environmental destruction By engaging artists widespread aesthetic and political engagement with environmental conditions and processes around the globe and looking at cutting edge theoretical political and cultural developments in the Global South and North *Decolonizing Nature* offers a significant original contribution to the intersecting fields of art history ecology visual culture geography and

environmental politics Art historian T J Demos author of *Return to the Postcolony Specters of Colonialism in Contemporary Art* 2013 considers the creative proposals of artists and activists for ways of life that bring together ecological sustainability climate justice and radical democracy at a time when such creative proposals are urgently needed **Political Ecology** Tor A. Benjaminsen, Hanne Svarstad, 2021-02-08 This textbook introduces political ecology as an interdisciplinary approach to critically examine land and environmental issues Drawing on discourse and narrative analysis Marxist political economy and insights from natural science the book points at similarities differences and inter connections between environmental governance in the global North and South A wide range of carefully curated case studies are presented with a particular focus on Africa and Norway Key themes of power justice and environmental sustainability run through all chapters The authors challenge established views and leading discourses and present research findings that may surprise readers Chapters cover topics including wildlife conservation climate change and conflicts land grabbing the effects of population growth on the environment jihadism in the African Sahel bioprospecting feminist political ecology and struggles around carbon mitigation within a fossil fuel based economy This introductory text provides tools and examples for both undergraduate and postgraduate students to better understand on going struggles about some of the world s most urgent challenges **The Politics of Evidence-Based Policy Making** Paul Cairney, 2016-04-11 The Politics of Evidence Based Policymaking identifies how to work with policymakers to maximize the use of scientific evidence Policymakers cannot consider all evidence relevant to policy problems They use two shortcuts rational ways to gather enough evidence and irrational decision making drawing on emotions beliefs and habits Most scientific studies focus on the former They identify uncertainty when policymakers have incomplete evidence and try to solve it by improving the supply of information They do not respond to ambiguity or the potential for policymakers to understand problems in very different ways A good strategy requires advocates to be persuasive forming coalitions with like minded actors and accompanying evidence with simple stories to exploit the emotional or ideological biases of policymakers **Rethinking Green Politics** John Barry, 1999-02-22 Winner of the PSA Mackenzie Prize for best politics book of 1999 *Rethinking Green Politics* offers a wide ranging overview and critical analysis of the theoretical framework that underpins the values principles and concerns of contemporary green politics and the appropriate institutional means for realizing green ends
