Macroeconomic and Monetary Policy Issues in Indonesia Akhand Akhtar Hossain, 2013-08-15 Following the acquisition of its sovereignty from the Netherlands in 1949 Indonesia experienced serious economic and political problems during the 1950s and 1960s before entering a three decade long period of rapid economic growth. Hard hit by the financial crisis of the late 1990s Indonesia undertook a wide range of economic and financial reforms. These reforms served to prepare it well for the 2007-08 global financial crisis through which Indonesia passed relatively unscathed. Drawing on empirical research this book presents a comprehensive empirical study on the key macroeconomic relations and monetary policy issues in Indonesia. The book analyses monetary, fiscal and exchange rate policies looking at their interactions and impacts on the economy. It demonstrates how important macroeconomic management for monetary and financial stability is to sustained national economic growth and development. Data from the 1970s is compared and contrasted with 1950s data to analyse macroeconomic policies and issues in an historical context. Statistical and econometric techniques are juxtaposed with general empirical results to supplement informative discussion of macroeconomic and monetary developments. This book is a useful contribution to studies on macroeconomics and international development as well as Southeast Asian studies.

Economic Imbalances and Institutional Changes to the Euro and the European Union Rajmund Mirdala, Rosaria Rita Canale, 2017-08-22 This book offers a critical perspective from which to observe evolution of the Euro Area and the European Union in these times of growing economic and political conflict.

Structural Unemployment Wolfgang Franz, 1992-03-06 The book is devoted to a theoretical and econometric analysis of structural unemployment by making use of the Beveridge curve i.e. the relationship between unemployment and vacancies. It is investigated to what extent various kinds of inflexibilities such as a higher regional and qualifications mismatch between labor supplied and demanded and an increased choosiness of employers and job seekers can contribute to an explanation for the high and persistent unemployment in the eighties. Based on theoretical foundations the studies marshal the empirical evidence for or against the mismatch hypotheses and give a critical assessment of the Beveridge curve. Moreover policy implications and recommendations are discussed at some length.

Investment, Growth and Employment Ciaran Driver, Paul Temple, 2005-08-10 Investment in both facilities and know how is essential for growth. Economists try to understand the forces that determine investment but investment behaviour is unruly. Often the term animal spirits is used to explain the resulting volatility. This volume presents studies to explain international investment behaviour and assess its impact on growth and jobs. The authors also examine policy measures to reverse the climate of low investment that has characterised recent decades. The contributors examine how well standard models of investment work, the role of finance constraints, the effect of risk and uncertainty, the impact of alternative forms of corporate governance, the forces shaping the adoption of new technology, the impact of foreign direct investment, the effect of investment on the NAIRU and the causal structure of investment and growth. Editors' introductions to the different sections of the book provide comprehensive overviews of the main theories of investment, the impact of

investment on growth and employment and examine the main questions raised for policy makers
