Economic Development and Environmental Gain Keith Clement, 2023-03-31 This volume contains detailed information and assessment of incentives and policy instruments available within Europe to encourage good practice and of how to achieve environmental gain in regional economic programmes It describes an appropriate methodology for securing improved environmental benefit and explores the potential for achieving regional environmental competitiveness There are insights based on wide international comparative experience of programme evaluation Regional Advantage and Innovation Susan Kinnear, Kate Charters, Peter Vitartas, 2012-12-04 Regional areas are key building blocks of society in many countries This compilation uses Australian case study examples to demonstrate how regional areas are uniquely well placed to contribute to national goals in innovation infrastructure provision water and food security environmental sustainability industry diversification healthy and liveable communities and natural disaster preparedness and response Each of these themes is examined in the context of using innovative approaches from regions to deliver outcomes that are nationally significant Authorship is drawn from a balance of leading practitioners and academics to provide stories that are both engaging and rigorous The case studies are contextualised by an analysis of regional advantage literature discussion on the regional policy implications and lessons and commentary around the key trends and drivers for innovation and regional advantage in Australia The book provides a convincing argument that focusing on regional innovation and development offers significant benefits to a nation as a whole 'Whither regional studies?' Andy Pike, 2013-09-13 Regional studies are at a vibrant conjuncture Regions continue to provide a conceptual and analytical focus for often overlapping concerns with economic social political cultural and ecological change In the context of increased interest in inter and multi disciplinary approaches regions remain an arena in which synthesis across disciplines economics geography planning politics and sociology can take place Yet recent work has raised fundamental questions about how we think about and research regions and regional change development governance and regulation First emergent conceptual ideas have introduced new thinking about space place and scale that interprets regions as unbounded relational spaces This work has disturbed notions of regions as bounded territories and questioned hierarchical systems of scale through more complex multi scalar approaches Second research methodology has grown in sophistication and sensitivity but remains somewhat polarised between the binaries of positivist often quantitative and more theoretically diverse typically qualitative approaches Last regional governance policy and politics are wrestling with the conceptual methodological and political complexities of new modes and geographies of governance and emergent multi agent and multi level institutional architectures This book brings together important voices in regional studies to contribute to and reflect upon these current issues and debates While we are at an early stage in beginning to think through what such conceptual theoretical methodological governance policy and political

innovations and developments mean for regional studies the magnitude and resonance of such issues underpin the vitality of research on the region This book was published as a special issue of Regional Studies *Green Business* B. S. Sahay, Roger R. **Competitiveness and Private Sector Development Western Balkans Competitiveness Outlook 2024: Regional Profile** OECD, 2024-06-26 Inclusive and sustainable economic growth in the six Western Balkan WB6 economies depends on greater economic competitiveness Although the gap is closing gradually the standards of living in WB6 are well below those of the OECD and EU Accelerating the rate of socio-economic convergence will require a holistic and growth-oriented approach to policy making This is the fourth study of the region formerly under the title Competitiveness in South East Europe and it comprehensively assesses policy reforms in the WB6 economies across 15 policy areas key to strengthening their competitiveness It enables WB6 economies to compare economic performance against regional peers as well as EU OECD good practices and standards and to design future policies based on rich evidence and actionable policy recommendations The regional profile presents assessment findings across five policy clusters crucial to accelerating socio-economic convergence of the WB6 by fostering regional co-operation business environment skills infrastructure and connectivity digital transformation and greening Economy specific profiles complement the regional assessment offering each WB6 economy an in-depth analysis of their policies supporting competitiveness They also track the implementation of the previous 2021 study's recommendations and provide additional ones tailored to the economies' evolving challenges These recommendations aim to inform structural economic reforms and facilitate the region's socio-economic convergence towards the standards of the EU and OECD Aanwinsten van de Centrale Bibliotheek (Queteletfonds) Bibliothèque centrale (Fonds Quetelet), 2001 **Economic Development and Resilience by EU Member States** Simon Grima, Inna

Romănova, Grațiela-Georgiana Noja, Tomasz Dorożyński, 2024-11-18 The chapters collected here examine the economic development main experiences lessons learned and the challenges and perspectives ahead of the new member states of the EU to identify the determinants of imbalances in the economic development of these countries Environment for Business: Strictly as per requirements of the Gujarat Technological University S. **The ACP Group and the EU Development Partnership** Annita Montoute, Kudrat Virk, 2017-01-01 This book constitutes a systematic and critical assessment of the nature evolution and prospects of the development partnership between the 79 member African Caribbean and Pacific ACP group of states and the 28 member European Union EU A core theme that runs through the work is that the ACP's partnership with the EU remains an important framework for addressing development challenges in the African Caribbean and Pacific regions but needs to adapt to changes in the global political economy as well as internal developments in both the ACP and the EU to sustain its relevance and effectiveness This is

crucial for the ACP group in particular given its origins in and core focus on development cooperation with Europe The authors in this volume examine the history of the ACP EU partnership since 1975 the EU s relationship with the African Caribbean and Pacific regions individually ACP experiences with economic partnership agreements with the EU and new political issues in particular security migration and diasporas Shedding light on the future prospects of this relationship this book will be of interest to both scholars and policymakers working on the ACP EU relationship and related development issues including trade aid security and migration

*Rethinking European Spatial Policy as a Hologram* Luigi Doria,Valeria Fedeli,Carla Tedesco,2006 Bringing together case studies from several European countries this book provides an in depth examination of the evolution of European spatial policy It offers an experimentation of new interpretative approaches to spatial planning which will prove essential to the international debate

**Development and Planning in Seven Major Coastal Cities in Southern and Eastern China** Jianfa Shen,Gordon Kee,2016-11-03 This book analyzes the recent growth of Guangzhou Shenzhen Fuzhou Shanghai Hangzhou Nanjing and Hong Kong seven major Chinese coastal cities The authors detail theoretical mechanisms spatial and non spatial models of development all while exploring possible directions to sustainability They also look at how these cities have developed over the last 30 years from the late 1970s to the 21st century Each has its own unique background regional and national positions advantages and functions Using diversified approaches and measurements for each city the authors argue that structural changes are necessary to achieve much needed sustainable development The book covers developmental issues such as the regaining of central city and global city statuses the role of governments in steering development and achieving goals through mega projects urban competitiveness positioning and branding Including varied assessment and intense suggestions for structural changes this book addresses core concerns for the sustainable growth of these metropolises A valuable book for students researchers and policy makers

*Trade and the Environment* Brian R. Copeland,M. Scott Taylor,2013-12-03 Nowhere has the divide between advocates and critics of globalization been more striking than in debates over free trade and the environment And yet the literature on the subject is high on rhetoric and low on results This book is the first to systematically investigate the subject using both economic theory and empirical analysis Brian Copeland and Scott Taylor establish a powerful theoretical framework for examining the impact of international trade on local pollution levels and use it to offer a uniquely integrated treatment of the links between economic growth liberalized trade and the environment The results will surprise many The authors set out the two leading theories linking international trade to environmental outcomes develop the empirical implications and examine their validity using data on measured sulfur dioxide concentrations from over 100 cities worldwide during the period from 1971 to 1986 The empirical results are provocative For an average country in the sample free trade is good for the environment There is little evidence that developing countries will specialize in pollution intensive products with further trade In fact the results suggest just the opposite free trade will shift pollution intensive goods production from poor countries with lax regulation to

rich countries with tight regulation thereby lowering world pollution The results also suggest that pollution declines amid economic growth fueled by economy wide technological progress but rises when growth is fueled by capital accumulation alone Lucidly argued and authoritatively written this book will provide students and researchers of international trade and environmental economics a more reliable way of thinking about this contentious issue and the methodological tools with which to do so
