Annual Report* ,2008 **Globalization** Jan-Erik Lane,2014-07-25 Efforts at coordination between nations are at the heart of the challenges of globalization Despite steadily growing interdependencies individual nations still have specific interests that present obstacles to globalization While some challenges inspired by the need to coordinate are viewed as inevitable by many they are less optimistic about prospects for success Jan Erik Lane argues that one should focus objectively upon the possibility of failures Lane analyzes four kinds of challenges to interdependency all of which are growing in geopolitical relevance First countries need to diminish their dependency on fossil fuel and shift to a reliable supply of energy because fossil fuels are diminishing Second environmental degradation must be addressed because it is accelerating under the strain of earth's population Lane advocates an ecological footprint approach Third a single global market economy and its complexities must be addressed as national economies are increasingly opened Finally as traditional state sovereignty weakens foreign military intervention in both international and intra state conflicts increases Governments are attempting to address these interdependencies or reply to the challenges they pose mainly through international organizations and regionalism These efforts are discussed at length In addition problems with international law are reviewed as Lane warns against the utopian hopes of global constitutionalism Globalization also examines the potential consequences of failing to address the need for coordination in efforts to address

shared global challenges **Institutions, Economic Growth, and the Curse of Natural Resources , The Revolution in Development Economics** James A. Dorn, Steve H.
