Credibility Without Rules

Mr. Carlo Cottarelli, Curzio Giannini, 1997-12-23 During the last 25 years monetary practice in most countries has increasingly been characterized by the attempt to achieve credibility of purpose while expanding the freedom of monetary authorities in controlling policy instruments Thus the world has moved toward monetary frameworks in which through appropriate institutional devices a better trade off between credibility of goals and flexibility of instruments could be achieved This attempt surveyed in this paper has taken many forms depending on the countries economic institutional and cultural specificities *Economic Policy* Georges de Menil, 1985 Output Measurement in Science and Technology C.

basis for cross country comparisons Wage behavior in the face of energy price shocks appears to have differed considerably among the major industrial countries Increased uncertainty reflecting in particular changes in the international economic environment and the stop go financial policies of several of the major countries during the 1970s and is frequently cited as a possible reason for the slowdown in growth mainly through its impact on private investment Views on the contribution of slower net capital accumulation to the deceleration in growth depend upon assessments of whether the efficiency of investment declined significantly after 1973 and on assumptions made about technological change and the embodiment of technical progress
