Economic Prehistory:

Economic Prehistory Gregory K. Dow, Clyde G. Reed, 2023-01-05 Around 15 000 years ago almost all humans lived in small mobile foraging bands By about 5 000 years ago the first city states had appeared This radical transformation in human society laid the foundations for the modern world We use economic logic and archaeological evidence to explain six key elements in this revolution sedentism agriculture inequality warfare cities and states In our approach the ultimate cause of these events was climate change We show how shifts in climate interacted with geography to drive technological innovation and population growth The accumulation of population at especially rich locations led to creation of group property rights over land stratification into elite and commoner classes and warfare over land among rival elites This set the stage for urbanization based on manufacturing or military defense and for elite controlled states based on taxation Our closing chapter shows how these developments eventually resulted in contemporary global civilization Economic Prehistory Grahame Clark, 2009-04-09 Throughout his career Grahame Clark has pioneered on a world scale the use of the archaeological record to document the economic and social life of prehistoric communities In Europe he was the first to employ the concept of the ecosystem in archaeology and to underscore the necessarily reciprocal relationship that exists between culture and environment In Britain he has played a major role in moving archaeology away from its preoccupation with typology and spurring on the newly emergent discipline of bioarchaeology Economic Prehistory reflects all these concerns Following a comprehensive bibliography of Professor Clark's writing the volume opens with a series of classic papers on basic subsistence activities such as seal hunting whaling fowling fishing forest clearance farming and stock raising Subsequent sections then deal with world prehistory and the thorny relationship between archaeology education and society The volume closes with a retrospective which looks critically at such figures of the past as Gordon Childe and Mortimer Wheeler and to the author's own renowned excavations at the Mesolithic site of Starr Carr **European Economic Prehistory** Robin Dennell, 1983 Ern hrungsgeschichte Holoz n Klimageschichte **Prehistoric Europe** Timothy Champion, 2016-06-16 The study of European prehistory has been revolutionized in recent years by the rapid growth rate of archaeological discovery advances in dating methods and the application of scientific techniques to archaeological material and new archaeological aims and frameworks of interpretation Whereas previous work concentrated on the recovery and description of material remains the main focus is now on the reconstruction of prehistoric societies and the explanation of their development This volume provides that elementary and comprehensive synthesis of the new discoveries and the new interpretations of European prehistory After an introductory chapter on the geographical setting and the development of prehistoric studies in Europe the text is divided chronologically into nine chapters Each one describes with numerous maps plans and drawings the relevant archaeological data and proceeds to a discussion of the societies they represent Particular attention is paid to the major themes of recent prehistoric research especially subsistence economy trade settlement technology and social

organization **Ecological Models in Economic Prehistory** Gordon Bronitsky,1983 *Salt; a Study in Economic Prehistory* Jacques Nenquin,1961 *The Role of Economic Prehistory* C. F. W. Higham,197? *The Agricultural Revolution in Prehistory* Graeme Barker,2009 Addressing one of the most debated revolutions in the history of our species the change from hunting and gathering to farming this title takes a global view and integrates an array of information from archaeology and many other disciplines including anthropology botany climatology genetics linguistics and zoology **Macroevolution in Human Prehistory** Anna Prentiss,Ian Kuijt,James C. Chatters,2009-09-18 Cultural evolution much like general evolution works from the assumption that cultures are descendent from much earlier ancestors Human culture manifests itself in forms ranging from the small bands of hunters through intermediate scale complex hunter gatherers and farmers to the high density urban settlements and complex polities that characterize much of today s world The chapters in the volume examine the dynamic interaction between the micro and macro scales of cultural evolution developing a theoretical approach to the archaeological record that has been termed evolutionary processual archaeology The contributions in this volume integrate positive elements of both evolutionary and processualist schools of thought The approach as explicated by the contributors in this work offers novel insights into topics that include the emergence stasis collapse and extinction of cultural patterns and development of social inequalities Consequently these contributions form a stepping off point for a significant new range of cultural evolutionary studies *Prehistory at Cambridge and Beyond* Grahame Clark,1989-08-25 Grahame Clark s book examines the development of prehistoric archaeology at Cambridge and the achievements of its graduates placing this theme against the background of the growth of archaeology as an academic discipline worldwide Prehistory in Cambridge began to be taught formally in 1920 and emerged as a full tripos soon after the Second World War From the outset it focused on the aims and methods of archaeological research providing in addition for combinations of study options ranging from early prehistory to the archaeology of the major civilisations of the Old World and the protohistory of Northern Europe The measure of its success is shown by the achievement of Cambridge graduates at home and overseas in both the study and the field A significant outcome of their work has been the widespread recognition of archaeology as a subject of broad educational value not merely for undergraduates but for human beings the world over **Hunter-Gatherer Economy in Prehistory** Geoff Bailey,1983-03-24 A series of case studies which combine an awareness of recent developments in hunter gatherer theory with a commitment to the analysis and interpretation of prehistoric material *Prehistoric Farming in Europe* Graeme Barker,1985-07-11 Drawing upon his own extensive knowledge of European archaeology Graeme Barker has impressively integrated the full range of archaeological data to produce in this book a masterly account of prehistoric farming in Europe on a unique scale He makes use of modern archaeological techniques to reconstruct the lives of prehistoric farmers in remarkable detail Not only do we now have a vivid picture of the prehistoric farmyard but we know what animals were kept how they were fed and why they were bred Evidence for crops grown and techniques of cultivation

and husbandry helps recreate the prehistoric landscape Even the social organisation that determined the use of resources and provided the crucial stimulus for agricultural change can be relived Graeme Barker develops his argument through analogies with the agricultural history of classical and medieval Europe and concludes that today s industrial farmers can learn much from the successes and failures of early European farming *Hunters in Transition* Marek Zvelebil,2009-06-18

Hunters in Transition analyses the emergence of post glacial hunter gatherer communities and the development of farming
