Economic Sociology Of Immigration:

Economic Sociology of Immigration, The Alejandro Portes, 1998 The Economic Sociology of Immigration forges a dynamic link between the theoretical innovations of economic sociology with the latest empirical findings from immigration research an area of critical concern as the problems of ethnic poverty and inequality become increasingly profound Alejandro Portes lucid overview of sociological approaches to economic phenomena provides the framework for six thoughtful wide ranging investigations into ethnic and immigrant labor networks and social resources entrepreneurship and cultural assimilation Mark Granovetter illustrates how small businesses built on the bonds of ethnicity and kinship can under certain conditions flourish remarkably well Bryan R Roberts demonstrates how immigrant groups expectations of the duration of their stay influence their propensity toward entrepreneurship Ivan Light and Carolyn Rosenstein chart how specific metropolitan environments have stimulated or impeded entrepreneurial ventures in five ethnic populations Saskia Sassen provides a revealing analysis of the unexpectedly flexible and vital labor market networks maintained between immigrants and their native countries while M Patricia Fernandez Kelly looks specifically at the Black inner city to examine how insular cultural values hinder the acquisition of skills and jobs outside the neighborhood Alejandro Portes also depicts the difference between the attitudes of American born youths and those of recent immigrants and its effect on the economic success of immigrant children ALEJANDRO PORTES is professor of sociology at Princeton University and faculty associate of the Woodrow Wilson School of Public Affairs CONTRIBUTORS Mark Granovetter M Patricia Fernandez Kelly Ivan Light Alejandro Portes Bryan R Roberts Carolyn Rosenstein and Saskia Sassen The Economic Sociology of Immigration Alejandro Portes, 1995-06-22 Portes suggests that immigration constitutes an especially appropriate Mertonian strategic research site for economic sociology in that it provides very good opportunities for investigating the embeddedness of economic relationships in social situations the contributors expand the conventional domain of economic sociology quite literally in both time and space Contemporary Sociology Alejandro Portes and his splendid band of collaborators make clear that the causes processes and consequences of migration vary dramatically from group to group that a group's history makes a profound difference to its fate in the American economy They have produced a sinewy book a book worth arguing with Charles Tilly Columbia University The Economic Sociology of Immigration forges a dynamic link between the theoretical innovations of economic sociology with the latest empirical findings from immigration research an area of critical concern as the problems of ethnic poverty and inequality become increasingly profound Alejandro Portes lucid overview of sociological approaches to economic phenomena provides the framework for six thoughtful wide ranging investigations into ethnic and immigrant labor networks and social resources entrepreneurship and cultural assimilation Mark Granovetter illustrates how small businesses built on the bonds of ethnicity and kinship can under certain conditions flourish remarkably well Bryan R Roberts demonstrates how immigrant groups expectations of the duration of their stay influence their propensity toward entrepreneurship Ivan Light

and Carolyn Rosenstein chart how specific metropolitan environments have stimulated or impeded entrepreneurial ventures in five ethnic populations Saskia Sassen provides a revealing analysis of the unexpectedly flexible and vital labor market networks maintained between immigrants and their native countries while M Patricia Fernandez Kelly looks specifically at the black inner city to examine how insular cultural values hinder the acquisition of skills and jobs outside the neighborhood Alejandro Portes also depicts the difference between the attitudes of American born youths and those of recent immigrants and its effect on the economic success of immigrant children

An Economic Sociology of Immigrant Life in Canada Abdolmohammad Kazemipur, 2004 Not long ago the integration of immigrants in host societies was perceived mostly in terms of assimilation an overly simplistic scenario based on which immigrants would learn the language and culture of the native population and the rest would just follow However the developments of the past two decades have shown just how complex this process can be This new book shows the diverse experiences of various groups of immigrants This book takes a fresh look at the experiences of immigrants to Canada The contents of the book are based on over five years of research the author has carried out in Canada and elsewhere using a variety of data sources from quantitative census data through specially designed survey information to materials derived from qualitative research The book is structured in such a way that it can be beneficial to a wide range of readers those interested in in depth examination of immigration issues those leaning more towards narrative texts and those looking only for general research trends and theoretical and policy implications Literature The Calm Before the Storm Preparing to Migrate to Canada Haves and Have nots Poverty Experiences of Immigrants The New Kid in Town Neighbourhood Poverty and Economic Performance What You Know and Who You Know Human Capital Social Capital and Immigrant Life Wrap up and Implications References Index

Why do some migrants integrate quickly while others become long term minorities What is the role of the state in the

settlement process To what extent are experiences in the past different from the present Are the recent migrants really integrating in another way than those in the past Is Islam indeed an obstacle to integration These are some of the burning questions which dominate the current politicized debate on immigration in Western Europe In this book leading historians and social scientists analyze and compare a variety of settlement processes in past and present migration to Western Europe Identifying general factors in the process of adaptation of new immigrants the contributors trace social changes effected by recent European immigration and the parallels with the great American migration of the 1880s 1920s The history of migration to Western Europe and the way these migrants found their place in the receiving societies is not only essential to understand the way nations deal with newcomers in the present but also constitutes a highly interesting laboratory for different paths of integration now and then By analyzing and comparing a wealth of settlement processes both in the past and in the present this book is both a bold interdisciplinary endeavor and at the same time the first attempt to identify general factors underlying the way migrants adapt to their new surroundings as well as how societies change under the influence of immigration The chapters in the book both look at specific groups in various periods but also analyses the structure of the state churches unions and other important organized actors in Western European nation states Moreover the results are embedded in the more theoretical American literature on the comparison of old and new migrants All chapters have an explicit comparative perspective either by comparing different groups or different periods whereas the general conclusion ties together the various outcomes in a systematic way highlighting the main answers to the central questions about the various outcomes of settlement processes Publisher **Haiti's Development Through Expatriate**

Marshall, 2006 The unemployment rate is the number of unemployed workers divided by the total civilian labour force which includes both the unemployed and those with jobs all those willing and able to work for pay In practice measuring the number of unemployed workers actually seeking work is notoriously difficult There are several different methods for measuring the number of unemployed workers Each method has its own biases and the different systems make comparing unemployment statistics between countries especially those with different systems difficult This book brings together diverse new research on this important area of economics Migration Theory Caroline B. Brettell, James F. Hollifield, 2022-07-01 The revised fourth edition of Migration Theory continues to offer a one stop synthesis of contemporary thought on migration Editors Caroline B Brettell and James F Hollifield remain committed to include coverage that is comparative and global in scope while enhancing similarities and differences between one academic field and the next All chapters have been revised to highlight cutting edge issues in the field of migration studies today The fourth edition welcomes two new authors Professors Marie Price and Francois H ran to offer a fresh approach with their chapters on geography and demography respectively Designed for undergraduate and graduate courses

in migration studies a primary goal of the text is to assist instructors in guiding students who may have little background on migration to understand important issues and the scientific debates This ensures Migration Theory is a highly valuable guide not only to the perspectives of one's own discipline but also to those of cognate fields **Ethnicity, Migration and**

Enterprise P. Panayiotopoulos, 2010-09-17 This book examines the development of enterprise among key migrant groups in Europe and the United States It argues that the development of ethnic economies provides the material basis for alternative models of social integration such as multiculturalism from below which are critical of mainstream assimilationist thinking

Religion and the New Immigrants Michael W. Foley, Dean R. Hoge, 2007-02-08 The explosive growth of the immigrant population since the 1960s has raised concerns about its impact on public life but only recently have scholars begun to ask how religion affects the immigrant experience in our society In Religion and the New Immigrants Michael W Foley and Dean R Hoge assess the role of local worship communities in promoting civic engagement among recent immigrants to the United States The product of a three year study on immigrant worship communities in the Washington DC area the book explores the diverse ways in which such communities build social capital among their members provide social services develop the civic skills of members and shape immigrants identities It looks closely at civic and political involvement and the ways in which worship communities involve their members in the wider society Evidence from a survey of 200 worship communities and in depth studies of 20 of them across ethnic groups and religious traditions suggests that the stronger the ethnic or religious identity of the community and the more politicized the leadership the more civically active the community The explosive growth of the immigrant population since the Local leadership much more than ethnic origins or religious tradition shapes the level and kind of civic engagement that immigrant worship communities foster Catholic churches Hindu temples mosques and Protestant congregations all vary in the degree to which they help promote greater integration into American life But where religious and lay leaders are civically engaged the authors find ethnic and religious identity contribute most powerfully to participation in civic life and the larger society Religion and the New Immigrants challenges existing theories and offers a nuanced view of how religious institutions contribute to the civic life of the nation As one of the first studies to focus on the role of religion in immigrant civic engagement this timely volume will interest scholars and students in a range of disciplines as well as anyone concerned about the future of our society **Networks, Trust and Social Capital** Sokratis

M. Konioridos, 2017-03-02 The concepts of social networks social capital and trust play an increasingly central role in the social sciences They have become indispensable conceptual tools for the analysis of post industrial late modern societies which are characterized by such features as the relative decline of formal hierarchies the development of flexible social arrangements in the sphere of production and the extreme mobility of capital This is the first book to study the interrelationships between these important concepts both theoretically and empirically Drawing on empirical investigations from a range of diverse European social contexts the contributors develop an economic sociology that builds on and extends

established theoretical perspectives The book opens with an introduction to the theoretical ideas relating social capital to reciprocity trust and social networks in line with current debates The authors go on to discuss the concept of social embeddedness addressing the economic effects of social capital by examining the network and trust foundations of labour markets and investigating the structural limits of trusting networks They conclude with an exploration of the impact of networking and the functioning of trust and social capital on the economic arrangements and performance of nascent capitalist economies in post Communist Europe This thematically unified collection by a team of distinguished contributors from across Europe provides an innovative and distinctive contribution to an expanding area of research

Entrepreneurship: New Perspectives in a Global Age Ann Dupuis, 2018-05-08 This title was first published in 2003 This book provides an innovative fresh approach to entrepreneurship It puts forward a flexible expansive conceptualization of the continuum of entrepreneurial behaviour and integrates context culture social networks and entrepreneurship as an embedded activity Motivated by a desire to bridge traditional academic boundaries the editors craft a heterodox perspective which interweaves strands from feminist and new institutional economics sociology management finance marketing and social policy Contemporary themes of major significance highlighted include the importance of new technology ethics culture and identity and entrepreneurship for indigenous younger and older people as distinct groups

Neighborhood Poverty and Segregation in the (Re-)Production of Disadvantage Dolores Trevizo, Mary Lopez, 2018-05-31 Focusing on shopkeepers in Latino neighborhoods in Los Angeles Dolores Trevizo and Mary Lopez reveal how neighborhood poverty affects the business performance of Mexican immigrant entrepreneurs Their survey of shopkeepers in twenty immigrant neighborhoods demonstrates that even slightly less impoverished multiethnic communities offer better business opportunities than do the highly impoverished racially segregated Mexican neighborhoods of Los Angeles Their findings reveal previously overlooked aspects of microclass as well as legal capital advantages The authors argue that even poor Mexican immigrants whose class backgrounds in Mexico imparted an entrepreneurial disposition can achieve a modicum of business success in the right U S neighborhood context and the more quickly they build legal capital the better their outcomes While the authors show that the local place characteristics of neighborhoods both reflect and reproduce class and racial inequalities they also demonstrate that the diversity of experience among Mexican immigrants living within the spatial boundaries of these communities can contribute to economic mobility
