□ Dependency Theory:

- Blames the international system for the backwardness of underdeveloped countries.
- Indigenous economic development was subverted first through political imperialism and now through what might be called economic imperialism.
 - First, the Europeans subjected the Third World to their colonial domination and now, after independence,
 - Third World countries are trapped in a cycle of economic dependency.
 - Free trade, foreign investments, foreign aid, and MNCs work to the disadvantage of the Third World.
 - They keep the Third World in a permanent condition of economic neo-colonialism.

The New Global Economy and the Developing Countries Gerald K. Helleiner, 1990. The text explores the principle issues surrounding the effective participating of the developing countries in the new more interdependent global economy. It is up to date and offers a fresh and critical assessment of traditional approaches in the sphere of international financial and trading policies. Particular emphasis is placed upon what is not known and requires further research. Among the major issues addressed are the impact of the global exchange rate system on developing countries, the efficacy of growth-oriented structural adjustment, lending, the future role of foreign direct investment, the relevance of the new trade theories to the developing countries, primary commodity market problems, poverty alleviation in adjustment programmes, and the role of information systems.

A Theory of Economic Integration for Developing Countries Fuat Andic, Douglas Dosser, 1971.

Development Economics Alain de Janvry, Elisabeth Sadoulet, 2021-05-30. This second edition of *Development Economics: Theory and Practice* continues to provide students and practitioners with the perspectives and tools they need to think analytically and critically about the current major economic development issues in the world. Alain de Janvry and Elisabeth Sadoulet identify seven key dimensions of development: growth, poverty, vulnerability, inequality, basic needs, sustainability, and quality of life, and use them to structure the contents of the text. The book gives a historical perspective on the evolution of thought in development. It uses theory and empirical analysis to present readers with a full picture of how development works, how its successes and failures can be assessed, and how alternatives can be introduced. The authors demonstrate how diagnostics, design of programs and policies, and impact evaluation can be used to seek new solutions to the suffering and violence caused by development failures. In the second edition, more attention has been given to ongoing developments such as pursuit of the Sustainable Development Goals, continuously rising global and national inequality, health as a domestic and international public good, cash transfers for social protection, carbon trading for sustainability. This text is fully engaged with the most cutting-edge research in the field and equips readers with analytical tools for impact evaluation of development programs and policies, illustrated with numerous examples. It is underpinned throughout by a wealth of student-friendly features, including case studies, quantitative problem sets, end-of-chapter questions, and extensive references. The companion website contains Excel and Stata exercises for students alongside materials for instructors. This unique text is ideal for those taking courses in development economics, economic growth, and development policy, and will provide an excellent foundation for those wishing to pursue careers in development.
