Post-growth Economics and Society Isabelle Cassiers, Kevin Maréchal, Dominique Méda, 2017-10-30 We stand on the threshold of a post growth world one in which the relentless pursuit of economic growth has ceased to constitute a credible societal project The symptoms that mark the end of an era are clear and incontrovertible a return to the regularities of the past is illusory The pursuit of economic growth no longer constitutes a credible societal project for ecological social and geopolitical reasons Edited by an impressive array of experts this book identifies several areas in which we must fundamentally rethink our societal organisation They ask what it means to abandon the objective of economic growth how we can encourage the emergence of other visions to guide society how global visions and local transition initiatives should be connected which modes of governance should be associated with the required social and technological innovations Alongside the necessary respect of ecological limits and equity in distribution the promotion of autonomy involving all in the building of socio political norms could serve for guidance The topics addressed over the chapters range from the future of work to the de commodification of economic relations the search for new indicators of progress to decentralized modes of governance and from the circular economy to polycentric transitions Each contribution brings a unique perspective a piece of a larger puzzle to be assembled Post growth Economics and Society is an important volume to those who study ecological economics political economy and the environment and society It invites theorists as much as practitioners to re explore the roots of our societal goals and play an active role in the systemic shift to come

Perspectives on the history of economic thought : selected papers from the history of economics society conference. Robert F. Hébert, 1993 Coevolutionary Economics: The Economy, Society and the Environment John Gowdy, 2013-04-18 The subject of this volume is the human economy and its coevolutionary relationship with the natural world This relationship is examined in three broad types of societies hunter gatherers agriculturalists and modern market economies A growing body of scientific evidence has made it clear that the current human impact on the environment is far above the level that can be maintained without causing profound changes in the biophysical world to which we belong The new fields of ecological economics and evolutionary economics can help us understand the relationship between the economy society and the environment and may help us to formulate effective policies to manage these changes Nature and Economic Society Tony Aspromourgos, 2023-12-01 This book focuses on the interrelationship between nature and the human economy Building upon his decades of research into classical and Keynesian economics Tony Aspromourgos here turns his attention to the interrelationship between nature and the human economy The result is a tightly argued concise but comprehensive interpretation of that vital issue undertaken in the framework of a Classical Keynesian synthesis The classical dimension is utilization of a surplus approach to production and distribution and the Keynesian dimension incorporation of demand side determination of economic activity levels and growth In this conception the human economy is understood as a circular flow but an incompletely circular system crucially dependent upon nature both as a source of finite non renewable and exhaustible resources for human production and consumption and as the destination or sink also finite for the waste and pollution from that production and consumption This is an introductory account of the subject providing maximum

accessibility by presupposing only basic knowledge of economic analysis and only elementary algebra but including a wide ranging guide to further and more advanced relevant literature Part I provides a comprehensive overview of the Classical Keynesian approach in the usual manner of economic analysis without systematic incorporation of nature Part II then incorporates the various dimensions of the natureeconomy interrelationship This book will be of great interest to readers of economic theory economics and the environment and heterodox economics

The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
