of communication in our economic lives Foregrounding the broader category of communicative practices the book understands economic life not only in terms of the macro economy but more sociologically as a set of processes of providing for material wants and needs How we talk about these wants and needs and our means for meeting them is how we come to understand our economic lives as meaningful The book explores how our economic lives are constructed communicatively in a variety of modes that move through but also exceed mass media from the symbolism of credit cards to the language used by economists and from social media promotion to debates in online forums Communication and Economic Life is a vital resource for students and scholars in media and communications and sociology and for anyone interested in how we talk about economic lives

Sublime Economy Jack Amariglio, Joseph W. Childers, Stephen E. Cullenberg, 2008-11-25 Over the last two centuries artists critics philosophers and theorists have contributed significantly to such representations of the economy as sublime It might even be said that much of the emergence of a distinctly modern art in the West is inextricably linked to the perception of art s own autonomy and therefore its privileged mostly critical gaze at the terrible mixture of wonder and horror of capitalist economic practices and institutions The premise of this collection is that despite this perceptual sharing sublime economy has yet to be investigated in a purely cross disciplinary way Sublime Economy seeks to map this critical territory by exploring the ways diverse concepts of economy and economic value have been culturally constituted and disseminated through modern art and cultural practice Comprising of 14 individual essays along with an editors introduction Sublime Economy draws together work from some of the leading scholars in the several fields currently exploring the intersection of economic and aesthetic practices and discourses A pressing issue of this cross disciplinary conversation is to discern how artists writers and cultural scholars constructions of distinct conceptions of economic value as pertains to aesthetic objects as well as to more everyday objects and relations of mass consumption have contributed to the ways value functions in and across disparate discourses Thus this book looks at how cultural critics and theorists have put forward working notions of economic value that have regularities and effects similar to those of the expert conceptions and discourses about value that have been the preserve of professional economists
