Effective Classroom Teamwork:

Effective Classroom Teamwork Gary Thomas, 2002-03-11 The nature of classroom practice is undergoing change as more and more adults are being brought into classrooms in response to such trends as parental involvement and the integration of children with special educational needs. The parents, teachers, ancillary staff and support workers comprising these new groups probably fail to recognise themselves as teams but nonetheless they are characterised by the same stresses which mark teamwork in any other setting. This book is a guide to working together as an effective team designed to show that they are part of a team and employ strategies to minimise chances of failure. Gary Thomas identifies key areas of concern including poor communication, status barriers and inadequate role definition and offers guidelines for dealing with these stresses and tensions in teamwork.

reader's knowledge on developments on the education of those pupils whose behaviour raises challenges to the educational system and causes concerns to those involved. The book is informed by research which was undertaken by the author in Cyprus and documents the views of educators and professionals on good practice. It explores the microsystem of a school and will enrich the knowledge and understanding of those with personal and professional interests in working with these pupils to be ready to accommodate their needs. The book also contributes to a better understanding of the nature of SEBD especially since the number of students presenting such difficulties in Cypriot primary education requires practitioners to be ready to provide the best practices possible.

Part One gives an overview of special and inclusive education, current thinking around issues related to equal opportunities and how this affects schools. It also illustrates how one Local Education Authority has tried to promote a policy of inclusion in its schools. Part Two includes a discussion of the challenges facing teachers in schools who attempt to put current national policies related to inclusion into practice and provides practical examples of whole school and classroom initiatives to support the learning of groups of pupils and individuals within them. Included are chapters on professional development for teachers of special educational needs, classroom strategies for teacher and pupil support, teachers and advice on differentiation, OFSTED and inclusive schools, the SENCO in the secondary school and equal opportunities for all.
