The SAGE Encyclopedia of Contemporary Early Childhood Education Donna Couchenour, J. Kent Chrisman, 2016-08-16 The general public often views early childhood education as either simply babysitting or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence, and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations, and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development: physical, cognitive, language, social, emotional, aesthetic, as well as a comprehensive review of best educational practices with young children, effective preparation for early childhood professionals, and policy-making practices, and addresses such questions as: How is the field of early childhood education defined? What are the roots of this field of study? How is the history of early childhood education similar to yet different from the study of public education? What are the major influences on understandings of best practices in early childhood education?

Twelve Best Practices for Early Childhood Education Ann Lewin-Benham, 2015-04-24 Popular author Ann Lewin Benham draws on her experience with the Reggio Approach to present 12 best practices inspired not only by Reggio but also by play-based and Montessori approaches to early childhood education. These practices are demonstrated one per chapter with scenarios from classrooms, dialogues of children and teachers, and work samples showing the outcome of using each practice. This resource includes a self-assessment tool to assist you in examining your practices and those of your school.

Seen and Heard Ellen Lynn Hall, Jennifer Kofkin Rudkin, 2011-01-13

Using examples from a Reggio inspired school with children from ages 6 weeks to 6 years the authors emphasize the importance of children's rights and our responsibility as adults to hear their voices Seen and Heard summarizes research and theory pertaining to young children's rights in the United States and offers strategies educators can use to ensure the inclusion of children's perspectives in everyday decisions Real life classroom vignettes illustrate how young children perceive the idea of rights through observation and discussion The authors work is based on these essential ideas 1 the one hundred languages children use for exploring discovering constructing representing and conveying their ideas 2 the pedagogy of listening in which children and adults carefully attend to the world and to one another 3 the notion that all children have the right to participate in the communities in which they reside
