Research literature is easy to embrace theoretically, but it is much more difficult to turn research into compelling collective action. How do we create the climate where the trusting members of a professional learning community improve the results of their practice? What does it take to be the small learning community that includes students and parents as well as professional educators? What will we do to harness the positive power of community to transform the learning and achievement of all students? This walk-through protocol provides both a process and a tool for inquiry-based professional development, community engagement, and ultimately student self-direction. It starts with a school's commitment to build an inquiry model that assumes the capacity for extraordinary learning on the part of students, teachers, administrators, and families. The protocol can be employed narrowly to guide the improving practice of a couple of teachers with a passion for biology, for example, or more broadly. Many of the improving schools highlighted in the chapters of this book chose the walk-through protocol as a frame for school-wide professional development that led to exceptional growth in learning and student achievement. This process allows schools to create a community where all members approach learning as an inquiry and are proactive designers of their success. Increasing Student Achievement Through Effective

Turning Average Instruction Into Great Instruction John O'Connor, 2009-01-16 *Turning Average Instruction into Great Instruction* details a clear and concise approach to school improvement focusing school leaders on the critical factor that has the greatest impact on student

achievement classroom instruction Decades of research demonstrate that what happens between teachers and students in our nation s classrooms has the greatest impact on how well those students learn The current trend in school reform is to tackle all aspects of a school in order to improve student achievement forcing school leaders to attempt to focus on the school culture use of materials community relations teachers pre service training the school s physical design classroom decorations and instruction Unfortunately such a wide scope leads to a lack of focus among school staff With his singular focus on classroom instruction what O Connor suggests is an antithesis to that approach School leaders will develop a common understanding of the high impact instructional components that should be seen in every classroom O Connor maps out how school leaders can align all personnel to systematically build training support and monitoring mechanisms that ensure that effective instruction becomes part of every classroom routine Effective Teachers=Student Achievement
