Zen Buddhism      **Sixth Cartesian Meditation** Eugen Fink, 1995-02-22 Ronald Bruzina's superb translation makes available in English a text of singular historical and systematic importance for phenomenology Husserl Studies a pivotal document in the development of phenomenology essential reading for students of phenomenology twentieth century thought Word Trade an invaluable addition to the corpus of Husserl scholarship More than simply a scholarly treatise however it is the result of Fink's collaboration with Husserl during the last ten years of Husserl's life This truly essential work in phenomenology should find a prominent place alongside Husserl's own works For readers interested in phenomenology and in Husserl in particular it cannot be recommended highly enough Choice a thorough critique of Husserl's transcendental phenomenology raises many new questions a classic J N Mohanty A foundational text in Husserlian phenomenology written in 1932 and now available in English for the first time      The Origins of Old Germanic Studies in the Low Countries Cornelis Dekker, 1999 This volume deals with the comparative study of Old Germanic languages in the Low Countries in the middle of the seventeenth century with special attention to the work of the philologist and lawyer Jan van Vliet 1622-1666      Bibliographia Cartesiana Gregor Sebba, 2012-12-06 This book offers a new type of working tool for Cartesian studies It presents the literature of the last 160 years in alphabetical order Part Two combined with a systematic analytical survey Part One and a detailed topical index to the whole Part Three This organization makes it possible to turn bibliographia from a repository of references into a workshop of research The systematic survey of Part One and the topical index of Part Three together offer a mise au point of Descartes studies over their full historical and topical range The results have often been surprising and illuminating to the author and if his experience is any guide the reader too will begin to wonder about certain seemingly well settled points or marvel at the Protean shapes which our elusive philosopher assumes when mighty commentators force him to reveal his true nature A work which has been in the making for fifteen years must show the traces of expansion in scope and changes in evaluation Bibliographia cartesiana amends my Descartes chapter in *A Critical Bibliography of French Literature* v 3 1961 see no I9a and supersedes an earlier version of Parts One and Two published in 1959 under the main title *Descartes and his Philosophy* v 1 set no I8a Part I Introduction to Descartes Studies divides the field into eleven broad areas      *The Reception of D. **Skepsis and Antipolitics: The Alternative of Gustav Landauer**, 2022-12-12 Gustav Landauer was an unconventional anarchist who aspired to a return to a communal life His antipolitical rejection of authoritarian assumptions is based on a radical linguistic scepticism that could be considered the theoretical premise of his anarchism The present volume aims to add to the existing scholarship on Landauer by shedding new light on his work focussing on the two interrelated notions of skepsis and antipolitics In a time marked by a deep doubt concerning modern politics Landauer's alternative can help us to more seriously address the struggle for a different articulation of our communitarian and ecological needs

**Melanie Klein Revisited** Susan Sherwin-White, 2018-03-08 While much writing has been devoted predominantly by contemporary Kleinian adult psychoanalysts to the Kleinian and post Kleinian development of Klein's work comparatively little has recently been written about the ongoing importance and character of Klein's clinical work for contemporary psychoanalytic psychotherapy or analysis with very small children 2-6 year olds Little attention now seems to be paid to the revolutionary character of her work from the start in the early 1920s with this age group and its challenges still relevant today or to her recognition of the importance of mother infant relations in the period long before World War II brought investigation into and understanding of problems of attachment separation and loss This book addresses these issues and re-explores Klein's work in these and other areas This book is concerned primarily with Klein's work with pre-latency children and aims to give these small children more of the voice today that Melanie Klein herself discovered

**Migrating Histories of Art** Maria Teresa Costa, Hans Christian Hönes, 2018-12-03 Art historians have been facing the challenge even from before the advent of globalization of writing for an international audience and translating their own work into a foreign language whether forced by exile voluntary migration or simply in order to reach wider audiences Migrating Histories of Art aims to study the biographical and academic impact of these self-translations and how

the adoption and processing of foreign language texts and their corresponding methodologies have been fundamental to the disciplinary discourse of art history. While often creating distinctly multifaceted personal biographies and establishing an international disciplinary discourse, self-translation also fosters the creation of instances of linguistic and methodological hegemony.

How is Society Possible? S. Vaitkus, 2012-12-06

How is society possible? In *Die Krisis der europäischen Wissenschaften und die transzendente Phänomenologie I*, Edmund Husserl is found with a pathos sending out pleas for belief. *Glauben* in his transcendental philosophy and transcendental ego. The traditional idea of theoretical reflection instituted in ancient Greece as the suspension of all taken-for-granted worldly interests has, through a partial realization of itself, forsaken itself in the one-sided development of the objective mathematical natural sciences as they themselves have become so taken-for-granted with the method and validity of their results held as so self-evident that they appear as resting self-sufficiently on their own grounds while pursuing an increasingly abstract mathematization of nature. The sciences are left without a foundation and their meaning within the world consequently unintelligible while their objective and valid abstract concepts continually tend to supersede the everyday life-world and render it questionable. In the end, these of belief in the everyday life-world or reflective evolving and exchanging attitudes doubt. Science ultimately leads to a disbelief in both and a search in one direction for idol leaders and in the other for the cult of experience. This collapse of Western belief systems becomes particularly threatening as it turns into nihilism, which is the development of beliefs in societal forms which employ 2 natural and social science for the liquidation of humanity and nature. Society starts becoming impossible.
