The Cultural Psyche Dinesh Sharma, 2021-04-01 As envisaged by Robert A LeVine many years ago the human development indicators have improved in many societies as income healthcare and educational opportunities have been enlarged Global transformations have led to significant decline in extreme poverty and an increase in working class and middle class families around the world in the emerging economies throughout Africa and Asia As the technological and global influences continue to challenge the dominant narrative in academic psychology conflated with WEIRD data assumptions interdisciplinary research will continue to increase in value and scope where LeVine s classical approach in psychological anthropology combined with psychoanalysis developmental psychology demography language or area research and population studies offers a path forward The essays collected here in addition to honoring LeVine s work hold out the promise of a real convergence between psychology and anthropology or the development of a psychosocial science a confluence between positivism and relativism empiricism and ethnography and social sciences and human sciences The scientific search for universal laws and the ever expanding search for cultural meanings in the diverse communities around the world must continue simultaneously and in conjunction with the transnational or global challenges we face today Hybridity fostered by interdisciplinary researchers has stood the test of time as the social sciences have gradually outgrown the monolithic ways of looking at the world The project of a psychosocial science represented by the work of Robert A LeVine at the intersection of psychology anthropology

demography child development and psychoanalysis maps out some of the challenges of a hybrid discipline Hybridity impacts not only the humanities and social sciences but physical sciences in genetics and genomics or applied disciplines like biotechnology and life sciences Thus it is important that we not lose sight of LeVine s spirit of interdisciplinary research Advocates for universalism the psychologists or behavioral scientists pursuing universal laws of human nature must collaborate with the growing number of relativistic scientists anthropologists sociologists or cultural studies experts searching for local meanings in small scale village communities There will be a confluence of social and human sciences or what C P Snow the English literary critic called the two cultures of the scientific revolution the sciences and humanities Praise for The Cultural Psyche This edited collection by Dinesh Sharma of his mentor Robert LeVine s papers is uniquely positioned between psychology anthropology and human development As one surveys its wide ranging and fascinating papers one not only comes to understand the principal lines of work carried out over a half century by a remarkable scholar At the same time one gains a sense of the history of these lines of work by a person who has lived through it reflected on it and contributed significantly to its advances This exceptionally valuable volume not only surveys child and human development in depth and across cultures it also points out ways in which these lines of work ought to be pursued in the years to come Howard E Gardner Hobbs Professor of Cognition and Human Development Harvard University Cambridge MA This book offers an overview of the wide ranging contributions of one of the giants of thinking about human development parenting and culture of the last 50 years By bringing together a large body of Bob s writings some of them entirely new this volume represents only one important dimension of LeVine s enormous influence on the thinking of today s scholars but in addition it should be noted how much his scholarship has shaped the work and the thinking of his many students and collaborators in ways that will persist through several academic generations Catherine E Snow Patricia Albjerg Graham Professor of Education Harvard University Cambridge MA Translation, Adaptation and Transformation Laurence Raw, 2012-01-12 Examines what adaptation and translation are and moves towards theorizing both as coherent disciplines **Lacan to the Letter** Bruce Fink, 2004 To read Lacan closely is to follow him to the letter to take him literally making the wager that he comes right out and says what he means in many cases though much of his argument must be reconstructed through a line by line examination And this is precisely what Bruce Fink does in this ambitious book a fine analysis of Lacan s work on language and psychoanalytic treatment conducted on the basis of a very close reading of texts in his *ICrits A Selection* As a translator and renowned proponent of Lacan s works Fink is an especially adept and congenial guide through the complexities of Lacanian literature and concepts He devotes considerable space to notions that have been particularly prone to misunderstanding notions such as the sliding of the signified under the signifier or that have gone seemingly unnoticed such as the ego is the metonymy of desire Fink also pays special attention to psychoanalytic concepts like affect that Lacan is sometimes thought to neglect and to controversial concepts like the phallus From a parsing of Lacan s claim that

commenting on a text is like doing an analysis to sustained readings of The Instance of the Letter in the Unconscious The Direction of the Treatment and Subversion of the Subject with particular attention given to the workings of the Graph of Desire Fink's book is a work of unmatched subtlety depth and detail providing a valuable new perspective on one of the twentieth century's most important thinkers Bruce Fink is a practicing Lacanian psychoanalyst analytic supervisor and professor of psychology at Duquesne University in Pittsburgh He is the author of A Clinical Introduction to Lacanian Psychoanalysis 1997 and The Lacanian Subject 1995 He has coedited three volumes on Lacan's seminars and is the translator of Lacan's Seminar XX On Feminine Sexuality the Limits of Love and Knowledge 1998 Icrits A Selection 2002 and Icrits The Complete Text forthcoming

Subject and Agency in Psychoanalysis Frances Moran, 1993-05 Psychoanalysis works with words words spoken by a subject who asks that the analyst listen This is the belief that underlies Francis Moran's rewarding exploration of a central problem in psychoanalytic theory namely the separation of the concepts of subject and agency Subject and Agency in Psychoanalysis contends that Freud simultaneously employs two frameworks for

explaining agency one clinical and one theoretical As a result Freud's exploration of agency proceeds from two logically incompatible assumptions The division between these assumptions is a part of Freud's psychoanalytic legacy Moran reads the Freudian inheritance in light of this division showing how Klein and Hartmann's theoretical concepts of subject are adrift from the subject who speaks in analysis Moran also shows that while Lacan's subject provides more focus on this issue Lacan reverts to the Freudian division in his use of logically contradictory assumptions concerning the location of agency Drawing on contemporary theory development from Lacanian innovations to the social theories of Anthony Giddens Moran proposes a new and fertile approach to a fundamental problem significantly narrowing the gap between psychoanalytic theory and practice

The Evolution and Application of Clinical Theory Judith Marks Mishne, 1993 There has always been a gap between theory and practice in psychotherapeutic work Beginning and experienced practitioners alike must struggle to integrate a variety of models and concepts that approach the practice of psychotherapy in vastly different ways In *The Evolution and Application of Clinical Theory* Judith Mishne offers a comprehensive yet accessible introduction to four influential models of personality development and organization traditional psychoanalytic drive theory ego psychology object relations theory and self psychology systematically exploring their implications for clinical practice Included is a history of the psychoanalytic movement from Freud to the present with special attention paid to the professionals politics and personalities that have contributed to its growth and modification In developing this history the author shows the interrelationship of theoretical concepts explaining why theories change and how clinical social personal and political factors dictate the timing of those changes Mishne then goes on to clearly and effectively demonstrate the application of these psychoanalytic theories to individual family and marital treatment Drawing on an extensive case study which includes individual treatment of an adolescent along with parent guidance marital treatment and family therapy she applies the four psychologies illustrating how each can be used and how they differ Finally she addresses the issue of conflicting paradigms and suggests ways in which clinicians can benefit from an understanding of all four models in assessment and treatment *The Evolution and Application of Clinical Theory* with its unique application of different theoretical models to a specific case is an invaluable reference for the novice and experienced practitioner alike It can also be used in courses in clinical theory and clinical practice
