Newly-Built Environment A Study of the Nubian Experience in Egypt Wael Salah Fahmi, 2014-04-01 Generally construction of dams is regarded as means of economic progress in many countries Major consequences of such projects are the inundation of upstream areas and the resettlement of entire communities in newly built environments where they experience dramatic transformation in their lifestyles The present study takes the Nubian resettlement experience after the creation of Lake Nasser that submerged their old settlements along the river Nile Following their resettlement the design of the newly built environment disrupted the Nubian traditional lifestyles and patterns of privacy mechanisms territoriality and social interaction The inadequacy of the newly built environment was mainly attributed to the Nubians transfer from spacious homes in the old villages to compact contiguous houses in the new settlements The arrangement of these resettlement state built houses distributed on the basis of household size has further resulted in the fragmentation and the dispersion of traditional kinship based neighborhoods Within an interdisciplinary approach the study is based on theoretical historical and conceptual themes and on empirical research It sets out to examine the households responses towards and adaptation mechanisms with the newly built environment looking critically at the achievements of imposed top down planning in meeting the socio cultural and economic needs of those resettled *Historical Dictionary of Egypt* Arthur Goldschmidt, Jr., 2023-07-25

Allegany Senecas and Kinzua Dam Joy A. Bilharz, 2002-01-01 In the late 1950s the U S Army Corps of Engineers announced its intention to construct a dam along the Allegheny River in Warren Pennsylvania The building of the Kinzua Dam was highly controversial because it flooded one third of the Allegany Reservation of the Seneca Nation of Indians Nearly six hundred Senecas were forced to abandon their homes and relocate despite a 1794 treaty that had guaranteed them those lands in perpetuity In this revealing study Joy A Bilharz examines the short and long term consequences of the relocation of the Senecas Granted unparalleled access to members of the Seneca Nation and reservation records Bilharz traces the psychological economic cultural and social effects over two generations The loss of homes and tribal lands was heart wrenching and initially threatened to undermine the foundations of social life and subsistence economy for the Senecas Over time however many Senecas have managed to adapt successfully to relocation creating new social networks invigorating their educational system and becoming more politically involved on local tribal and national levels **Resettling Displaced**
