The Christian Invention of Time Simon Goldhill,2022-02-03 Time is integral to human culture Over the last two centuries people s relationship with time has been transformed through industrialisation trade and technology But the first such life changing transformation under Christianity s influence happened in late antiquity It was then that time began to be conceptualised in new ways with discussion of eternity life after death and the end of days Individuals also began to experience time differently from the seven day week to the order of daily prayer and the festal calendar of Christmas and Easter With trademark flair and versatility world renowned classicist Simon Goldhill uncovers this change in thinking He explores how it took shape in the literary writing of late antiquity and how it resonates even today His bold new cultural history will appeal to scholars and students of classics cultural history literary studies and early Christianity alike

Making Time Richard Whipp,Barbara Adam,Ida Sabelis,2002-07-04 Time is an essential feature of social and organizational life and part of the deep structure of business activity Plans performance productivity and pay are all linked to and often measured by time Yet time is often taken for granted in daily life and the business world The aim of this book is to bring time into sharper focus and in particular to look at the way time is constructed made managed and used in organizations The book both provides an overview of some of the key concepts in time time s arrow time s cycle clock time etc and it explores how particular features of the modern world global time futures etc extend and change the temporal dimension of organizational activity Making Time emphasizes the

richness of the temporal relations within organizations and the wealth of competing attempts to order and control time in the act of managing. It describes and explains this temporal complexity as it occurs in management giving full recognition to the way that people create their own sense of time alongside the official temporal apparatus of the clock and diary. The contributors use a variety of management perspectives: strategy, organization theory, decision making, industrial relations and marketing and deliberately place the experience of more traditional industrial settings alongside those at the forefront of the new economy. *Making Time* seeks to spark a debate across the field of management that does justice to the richness of the temporal features of contemporary organizations. The book will be vital reading for those who want to understand the complexities of time in organizations and the modern world and the challenges it presents for the theoretical and practical spheres of management.

A Sociological Theory of Communication Loet Leydesdorff, 2001-01-01. Networks of communication evolve in terms of reflexive exchanges. The codification of these reflections in language that is at the social level can be considered as the operating system of society. Under sociologically specifiable conditions the discursive reconstructions can be expected to make the systems under reflection increasingly knowledge intensive. This sociological theory of communication is founded in a tradition that includes Giddens' 1979 structuration theory, Habermas' 1981 theory of communicative action and Luhmann's 1984 proposal to consider social systems as self-organizing. The study also elaborates on Shannon's 1948 mathematical theory of communication for the formalization and operationalization of the non-linear dynamics. The development of scientific communications can be studied using citation analysis. The exchange media at the interfaces of knowledge production provide us with the evolutionary model of a Triple Helix of university, industry, government relations. The construction of the European Information Society can then be analyzed in terms of interacting networks of communication. The issues of sustainable development and the expectation of social change are discussed in relation to the possibility of a general theory of communication.

REVIEW In this book Loet Leydesdorff sets out to answer the question: Can society be considered as a self-organizing autopoietic system? In the process Leydesdorff develops a general sociological theory of communication as well as a special theory of scientific communication designed to analyze complex systems such as the European Information Society. From review in JASIST 53:1, 2002, 62-63.

Hidden in Historicism Harry Jansen, 2020-06-10 Hidden in Historicism considers how the nineteenth century philosophy of historicism depicts three forgotten time regimes a time of rise and fall an ambiguous time of synchronicity of the non synchronous and a time in which decisive moments dominate Before the eighteenth century time was past oriented This inverted in the Enlightenment when the future became dominating Today this time of progress continues to be embraced as a time of the modern Yet inequality increasing violence and climate change lead to doubts over a bright future In this book Harry Jansen moves away from the heritage of Reinhart Koselleck and his single time of the modern towards a historicist threefold temporal approach to history writing In the time regime of the twenty first century past present and future coexist It is a heterogeneous time that takes on the three forms of historicism Jansen's study shows how all three times exist together in current historiography and contribute to a better understanding of the world today Based on the idea that an incarnated time rules everything that happens in reality the book offers a fresh perspective on the ongoing discussion about time and time regimes in contemporary philosophy and theory of history for students and scholars both time specialists and the non specialist

The digital age places premiums on just in time deliveries continual innovation instantaneous connectivity and around the clock availability. While some celebrate this 24/7 culture others see it as profoundly destructive to the natural rhythm of day and night and to human happiness. Have we entered an era of a perpetual present that depletes the future and erodes our grasp of the past? Beginning its examination around 1900 when rapid modernization was accompanied by comparably intense reflection on changing temporal experience *Precarious Times* provides historical depth and perspective to current debates on the digital now. Expanding the modern discourse on time and speed Fuchs deploys such concepts as attention slowness and lateness to emphasize the uneven quality of time around the world.

Staging Blackness Priscilla Dionne Layne, Lily Tonger-Erk, 2024-05-16 *Staging Blackness* provides a multifaceted look at how Blackness has been staged in Germany from the eighteenth century the birth of German national theater until the present. In recent years the German stage has been at the forefront of discussions about race from cases of blackface to fights for better representation within the professional community. These debates frequently invoke larger discussions about the politics of race in German theater and their origins and beyond. Written by scholars and theater professionals with a wide variety of historical and theoretical expertise the chapters seek to explore the connections between the German discourse on national theater and emerging ideas about race analyze how dramaturges deal with older representations of Blackness in current productions and discuss the contributions Black German playwrights and dramaturges have made to this discourse. Historians question how these plays were staged in their time while cultural studies scholars contemplate how to interpret the function of race in these plays and how they can continue to be staged today.

Experience and Conflict: The Production of Urban Space Panu Lehtovuori, 2016-12-05 When designing planning and building urban spaces many contradictory and conflicting actors practices and agendas coexist This book propounds that at present this process is conducted in an artificial reality Concept City characterized by a simplified and outdated conception of space It provides a constructive critique of the concepts underlying the practices of planning and architecture and in order to facilitate more dynamic inclusive and subtle practices it formulates a new theory about space in general and public urban space in particular The central notions in this theory are temporality experiment and conflict which are grounded on empirical observations in Helsinki Manchester and Berlin While the book contextualizes Lefebvre s ideas on urban planning and architecture it is in no way limited to Lefebvrian discourse but allows insights to new theoretical work including that of Finnish and Swedish authors In doing so it suggests and develops exciting new approaches and tools leading to experiential urbanism

The European Social Model under Pressure Romana Careja, Patrick Emmenegger, Nathalie Giger, 2019-07-11 The European Social Model is at a crossroad Although from the 1990s onwards the threat of an imminent crisis shaped much of the rhetoric surrounding the future of the welfare state disagreement within the academic community remains What is however increasingly clear is that with the global financial crisis and the Euro crisis that followed it the challenges the European Social Model faces have become more acute and demand action This volume launches a multifaceted inquiry into these challenges Each contribution written by renowned scholars in their fields represents an in depth exploration of issues that cut to the core of current political economic and social processes They are an invitation to the seasoned scholars as well as to the beginning students of social sciences public administration or journalism to engage with by now a large body of scholarship to accompany the authors in their endeavours to seek an explanation to burning questions and start their own inquiries
