The Idea of the Cottage in English Architecture, 1760 - 1860 Daniel Maudlin,2015-07-24 The Idea of the Cottage in English Architecture is a history of the late Georgian phenomenon of the architect designed cottage and the architectural discourse that articulated it It is a study of small buildings built on country estates and not so small buildings built in picturesque rural settings resort towns and suburban developments At the heart of the English idea of the cottage is the Classical notion of retreat from the city to the countryside This idea was adopted and adapted by the Augustan infused culture of eighteenth century England where it gained popularity with writers artists architects and their wealthy patrons who from the later eighteenth century commissioned retreats gate lodges estate workers housing and seaside villas designed to appear as cottages The enthusiasm for cottages within polite society did not last By the mid nineteenth century cottage related building and book publishing had slowed and the idea of the cottage itself was eventually lost beneath the Tudor barge boards and decorative chimneystacks of the Historic Revival And yet while both designer and consumer have changed over time the idea of the cottage as the ideal rural retreat continues to resonate through English architecture and English culture

The Conservation Movement: A History of Architectural Preservation

Miles Glendinning,2013-01-17 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians In many cities across the world particularly in Europe old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive How has that widely shared belief come about and is its continued general acceptance inevitable Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last

two centuries has this care been elaborated and energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity The close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning s new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely

[The Architectural Forum](#) ,1923 **House Beautiful** ,1928 [Le Corbusier and the Occult](#) Jan Birksted,2009 Le Corbusier grew up in La Chaux de Fonds in Switzerland a city described by Karl Marx as one unified watchmaking industry Among the unifying social structures of La Chaux de Fonds was the Loge L Amiti the Masonic lodge with its francophone moral social and philosophical ideas including the symbolic iconography of the right angle rectitude and the compass exactitude Le Corbusier would later describe these as my guide my choice and as his time honored ideas

ingrained and deep rooted in the intellect like entries from a catechism Through exhaustive research that challenges long held beliefs J K Birksted s *Le Corbusier and the Occult* traces the structure of Le Corbusier s brand of modernist spatial and architectural ideas based on startling new documents in hitherto undiscovered family and local archives Publisher *The Picturesque Architecture of Mexico* Louis La Beaume,1915 **The First Frame** Pannill Camp,2014-12-04 A unique account of the way architects dramatists and philosophers transformed theatre space in the eighteenth century Immaterial Architecture Jonathan Hill,2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates This issue drives Hill s explorative look at the immaterial aspects of architecture The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter command of drawing and design of spaces and surfaces Focusing on immaterial architecture as the perceived absence of matter Hill devises new means to explore the creativity of both the user and the architect advocating an architecture that fuses the immaterial and the material and considers its consequences challenging preconceptions about architecture its practice purpose matter and use This is a useful and innovative read that encourages architects and students to think beyond established theory and practice **Scene Design in the American Theatre from 1915 to 1960** Helen N. Larson,Orville Kurth Larson,1989-01-01 *Architecture, Actor and Audience* Iain Mackintosh,2003-09-02 Understanding the theatre space on both the practical and theoretical level is becoming increasingly important to people working in drama in whatever capacity Theatre architecture is one of the most vital ingredients of the theatrical experience and one of the least discussed or understood In *Architecture Actor and Audience* Mackintosh explores the contribution the design of a theatre can make to the theatrical experience and examines the failings of many modern theatres which despite vigorous defence from the architectural establishment remain unpopular with both audiences and theatre people A fascinating and provocative book

History of Architectural Conservation Jukka Jokilehto,2007-06-07 A History of Architectural Conservation expands knowledge about the conservation of ancient monuments works of art and historic buildings It includes the origins of the interest in conservation within the European context and the development of the concepts from Antiquity and the Renaissance to the present day Jokilehto illustrates how this development has influenced international collaboration in the protection and conservation of cultural heritage and how it has formed the principal concepts and approach to conservation and restoration in today s multi cultural society This book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement Accessible and of great interest to students and the general public it includes conservation trends in Europe the USA India Iran and Japan
