A Distinctive Industrialization J. K. J.

Thomson, 2003-11-13 This book first published in 1992 is a study of the development of Barcelona's cotton industry from its origins in calico printing in 1728 to its introduction of steam power in 1832. It thus describes the experiences of the leading industry of the city and one which provides the only Mediterranean exception to the tendency of early industrialization to be concentrated in northern Europe. The book bridges the pre-industrial and early industrial periods offering answers to such questions as what caused merchant capital to move into industrial investment, what were the links between pre-industrial industrial activity and industrialization proper, is it apt to refer to the economic changes of these years as an industrial revolution, should industrialization be studied on a regional or a national basis. A further purpose is to provide an interpretation of the characteristics of the Catalan economy and of its relationship to that of Spain as a whole, thereby contributing to the understanding of the Catalan question.

Memoria acerca del estado de la industria en la provincia de Madrid en el año 1905 Spain. Dirección General de Agricultura, Industria y Comercio, 1907

Money in the Pre-Industrial World John H. Munro, 2015-10-06 The papers in this edited volume discuss key elements of monetarism including coin denominations, the role of bullion and case studies of substitute moneys.

Industrial Development in Mexico Walid Tijerina, 2019-05-02 This book explores developmental policymaking across the multiple levels of Mexico's contemporary state, arguing that many of the innovations in industrial policy have been driven at the subnational level. In the three decades since Mexico's neoliberal turn in its political economy, subnational units of government have taken a lead in industrial transformation, galvanising policy from below. With most literature on new developmentalism focusing on the national level, this book is an important exploration of the differentiated and rewarding results that may be found below the state's centre. Based on an original dataset of written and oral interviews gained from national and subnational governmental units of industrial policymaking in Mexico, the book shows how attribution and power are diffused across the contemporary state's multiple levels. Notable subnational projects explored by the book include public-private collaboration, productive investments and an interesting array of incentives targeted towards industrial upgrading and innovation. The book concludes by providing a distinctive and systematic comparison between subnational units from different countries in Latin America and further afield in order to assess the commonalities of developmental roles and policies. *Industrial Development in Mexico* will be an important read for scholars across the fields of political science, political economy and Latin American development.

El món urbà a la Corona d'Aragó del 1137 als decrets de nova planta Salvador Claramunt, 2003 *Fuerzas de trabajo* Beverly J. Silver, 2005-02-22 Este libro traza el comportamiento de la fuerza de trabajo colectiva al hilo de la experiencia de los diversos movimientos obreros que durante el largo siglo XX han protagonizado en todo el mundo las luchas obreras de nuestro más estricto presente. El análisis de los conflictos laborales se efectúa utilizando un escenario temporal de larga duración y una perspectiva espacial global para demostrar cómo los distintos movimientos obreros han

estado relacionados con las dinámicas del capitalismo histórico la política mundial y los procesos de constitución social desde finales del siglo XIX hasta nuestros días. A lo largo de sus páginas se pone de manifiesto que allí donde se ha desplazado el capital en busca de superbeneficios y de la explotación de fuerza de trabajo peor retribuida se ha encontrado indefectiblemente con la lucha encarnizada de los trabajadores. Los lugares de la protesta han cambiado y las composiciones de clase de la fuerza de trabajo también pero únicamente para dar lugar a procesos inéditos de formación de nuevas clases obreras y modalidades originales de antagonismo y lucha de clases. Cartografías esenciales para comprender cómo funciona el antagonismo de los sujetos productivos en la economía mundo capitalista y cómo se producen el conflicto y las luchas en el continuo proceso histórico de formación y destrucción de los bloques sociales y de los sujetos políticos que conforma la dinámica política de nuestra época.
