#### 3.1 Deregulation (Reconfiguring Power Systems)

Traditionally, utilities were '**regulated monopoly**' business and their structure was **vertically integrated**. The power sector was characterized by operation of a single utility generating, transmitting and distributing electrical energy in its area of operation. Electric power was looked upon as a service and not a commodity.

- Monopoly status was granted to companies to protect their large investment.
- Single utility in one area of operation and universal supply obligation (USO)
- Regulations were introduced to prevent utilities misusing their monopoly and harming the customers.
