have given complete satisfaction since their installation in 1931.

No other synchronous clock has the same record.

• • •

The success of the Synclock is due to the scientific design of its motor which possesses the following advantages—

- Self-starting—does not stop when a momentary interruption occurs.
- Working noise is a muted and weak humming which is inaudible and long life.
- Requires no periodic oiling, cleaning or repainting.
- No tendency to overheat or burn.

These features and the large margin of power under the Synclock guarantees for superior clock keeping under normal and abnormal stresses by previous methods of construction.

• • •

Electricity Contractors and Authorities interested in Electric Clock installations including Public Time should consult their engineers or our Engineers when longer experience is at their disposal.
