Electricity In Economic Development The Experience Of Northeast Asia:

Electricity in Economic Development Yoon Hyung Kim, Kirk R. Smith, Kennon Breazeale, 1989-02-21 This landmark study is the result of a collaborative research effort among the East West Center and a group of institutions in China Taipei Japan and Korea in consultation with experts at the Massachusetts Institute of Technology and the Electric Power Research Institute of California The first project of its kind to mobilize senior power experts in the three major countries of Northeast Asia for cooperative electric future assessment Electricity in Economic Development highlights the critical role of the electric power sector in influencing a nation s future industrial development and its energy supply demand pattern in the post oil crisis era

Public Infrastructure Performance in Developing Countries Abdul Ghafoor, 2024-11-01 This title was first published in 2000 An investigation of the performance of the electric power and telecommunication sectors of Pakistan at the firm level as well as the sector as a whole seeking to identify and quantify the extent of inefficiencies Since physical or financial or productivity indicators alone are not able to explain the duality of public infrastructure purposes the financial and productivity indicators have been used in evaluating the performance of these sectors Further a Cobb Douglas production function has also been used to calculate the trend in the growth of total factor productivity Economies of scale have also been studied in the case of electric power generation The results of the study show that in Pakistan one of the usual motives for privatization to avoid the poor financial results of state enterprises is not relevant for electricity and telecommunications enterprises This however appears to be due to the financial subsidies they received through access to low cost loan finance and grants rather than to their efficiency in operations By the economic criteria of growth of TFP none of the enterprises do well and two have a negative TFP growth The case for reforming these enterprises is strong and alternative modes of organization finance and ownership need to be considered

The Pacific Rim, Second Revised Edition Peter N. Nemetz, 1990-01-01 As the importance of the Pacific Rim as a global centre of large scale investment development and trade continues to increase so do the potential benefits that Canada and other countries could reap as a result of an increased presence in this diverse region This book a revised and to a large extent new version of The Pacific Rim Investment Development and Trade 1987 integrates a broad range of current economic data concerning the Pacific Rim with some of the more important theoretical issues in the area of economic development and trade It demonstrates the paradoxical combination of strength and fragility that characterizes the emerging integrated Pacific Rim economy and attempts to clarify the nature of the framework and constraints that face foreign investors and trading partners The historical background of Japan s trade with other Pacific nations is examined in the opening chapter which is complemented by a new article outlining in detail the nature of and rationale for the profound change in Japan s foreign direct investment in the 1980s Other articles analyze trade in the ASEAN countries Indonesia Malaysia the Philippines Singapore and Thailand and discuss the emerging financial centres in the Pacific Rim New contributions deal with the policy environment for Pacific strategic management

compare the financial centres of Hong Kong and Singapore as these face the challenge of strategic adjustment and repositioning in international financial markets during the 1990s and present a theoretical framework for comparing US and Japanese trade policies The second part of the book examines the critical role of energy in the future development of the Pacific Rim and its interdependence with other global regions New articles discuss the progress and prospects for energy cooperation in the Pacific Basin and the potential for further development of nuclear power while those dealing with the British Columbia coal industry and the changes in the energy systems of Japan and China have been updated to reflect current data Another new contribution seeks to explain the excess capacity in the coal industry coming to the conclusion that the experience of the past twenty years is unlikely to be repeated thanks to new technologies in steel production and the increased steel capacity of such Pacific Rim countries as Korea Taiwan and China Looking beyond its traditional ties with Europe and the United States Canada is in a particularly advantageous position to participate in the development and integration of the Pacific Basin Canada's geographic location coupled with its increasing economic and cultural ties to East Asia suggest that this country can have a profound effect upon and will be profoundly affected by Pacific Rim development in the coming decade While the risks may be high and the payback period long the potential return on investment is significant

Postal and Delivery Services Michael A. Crew, Paul R. Kleindorfer, 2013-12-01 When Postmaster General Creswell penned his concern about the impact of electronic diversion on his postal organization the year was 1872 General Creswell it turned out fretted unnecessarily Facsimile did not achieve commercial viability until roughly a century after his tenure as Postmaster General and today that technology is fading rapidly from the communication scene Moreover it never appears to have significantly affected physical letter volumes However if General Creswell were leading a major postal organization today he likely would feel threatened by the potential of Internet communication to cause electronic diversion of physical mail Should recent technology developments cause the oft predicted but so far incorrect inflection point that would mark the beginning of declining mail volumes the implications from a management standpoint will be profound The relatively fixed nature of postal costs suggest that volume declines must be offset though improved productivity reduced cost of inputs revenue from new products that share common costs or reduced level of universal service *Handbook of the International Political Economy of Energy and Natural Resources* Andreas Goldthau, Michael F. Keating, 2018-01-26 This Handbook offers a comprehensive overview of the latest research from leading scholars on the international political economy of energy and resources Highlighting the important conceptual and empirical themes the chapters study all levels of governance from global to local and explore the wide range of issues emerging in a changing political and economic environment

Integrated Electricity Resource Planning A. de Almeida, Arthur H. Rosenfeld, Jacques Roturier, Jorgen Norgard, 2012-12-06 Since the mid seventies electric utilities were faced with escalating construction costs growing environmental plus siting constraints and increasing uncertainty in demand forecasting To cope with the increasing demand

for energy services utilities can either invest in supply side options new generation transmission and distribution facilities or in demand side options Demand side options include policies programmes innovative pricing schemes and high efficiency end use equipment equipment providing the same or better level of services but using less energy or peak power Recent experience in both North America and Europe show that demand side options are usually cheaper and less damaging from the environmental point of view and also their potential can be tapped in a shorter term than other supply side options This workshop was directed at the discussion and analysis of cost effective methodologies to achieve the supply of electric energy services at minimum cost and minimum environmental impact The programme included new developments in power planning models which can integrate both supply side and demand side actions Quantitative assessments of the environmental impact of different supply demand strategies were analyzed Planning models which deal with uncertainty and use multicriteria approaches were presented Case studies and experiments with innovative concepts carried out by utilities in several countries were discussed Load modelling and evaluation of demand side programmes was analyzed Additionally the potential for electricity savings in the industrial commercial and residential sectors was presented New research directions covering planning models programmes and end use technologies were identified

Presidents, Parliaments, and Policy Stephan Haggard, Matthew D. McCubbins, 2001-01-15 Advocates of parliamentary rule have been highly critical of presidentialism for dividing powers and providing the opportunity for gridlock between branches Fixed executive terms can saddle publics with ineffectual leaders who are not easily removed Yet the great theorists of presidential rule beginning with the Federalists saw very different qualities in the same institutions a desirable combination of strong leadership with checks on executive discretion These diverse assessments arise because we have surprisingly little comparative work on how presidential democracies function The introductory essays in this volume lay the theoretical groundwork for such comparative analysis Drawing on detailed cases of economic policymaking in Asia Latin America and Central Europe this book shows the diversity of presidential systems and isolates the effects of presidentialism from other factors that influence public policy such as party systems In doing so it casts doubt on the critics of presidential rule and underscores the continuing vitality of this particular form of democratic rule
