Electron Micrographs of Limestones and Their Nannofossils Alfred G. Fischer, Susumu Honjo, Robert E.

Garrison, 2017-03-14 This monograph contains over fifty high quality plates of electron micrographs of limestones It spans the field of limestones in age from Cambrian to Recent and in type from deep sea oozes to intertidal rocks It represents the outcome of four years of research in the new field of electron microscopy applied to rocks The illustrations show the spectacular results and much more is revealed in fossils and textures than would be expected on the basis of optical studies Originally published in 1967 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Electron Micrographs of Limestones and Their Nannofossils [by] Alfred G. Fischer, Susumu Honjo [and] Robert E. Garrison Alfred G. Fischer, 1967 **Recent Developments in Carbonate Sedimentology in Central Europe** German Müller, G.M. Friedman, 2012-12-06 In the field of sedimentary research ever increasing emphasis has been put on the investigations of carbonates and carbonate rocks during the past 30 years It is thus quite natural that in Central Europe where classical carbonate investigations have already been carried out 100 years ago numerous scholars turned to the study of this sediment type On the occasion of a visiting professorship of G M FRIEDMAN at the Laboratorium für Sedimentforschung Heidelberg University a seminar on Recent Developments of Carbonate Sedimentology in Central Europe was held in July 1967 90 persons involved in carbonate investigations participated and 35 lectures were held The present volume contains 30 papers summarizing the different subjects of the seminar Of course these contributions only represent a small part of the work actually performed in the field of carbonate research in Central Europe We believe however that they give a general survey of the work and the working methods employed in the different sectors of carbonate investigations One of the purposes of the present symposium is to acquaint the English speaking countries with our recent results which usually due to the language barrier are not accessible to them **Princeton Alumni Weekly**, 1967 *Microfacies Analysis of Limestones* E. Flügel, 2012-12-06 *Abstracts of North American Geology*, 1968 **Carbonate Microfabrics** Richard Rezac, Dawn L. Lavoie, 2012-12-06 Carbonate Microfabrics is the first attempt to bring together in one reference the application of microfabric analysis to the solution of problems in the fields of geology geophysics and geotechnique This book the result of a symposium and workshop on carbonate microfabrics explores the relationship of microfabrics to fundamental properties and processes in carbonates Carbonate Microfabrics will be of particular interest to geologists and is intended to be of general interest to researchers in such related fields as geochemistry geophysics and geotechnique **Carbonate Platform Slopes — A Record of**

Changing Conditions Hildegard Westphal, 2008-01-03 Periplatform slope sediments from the Bahamas serve as an example for a small scale sedimentologic record of environmental changes Carbonate platforms react sensitively to sea level fluctuations Therefore sediments deposited on the slope during lowstands differ in composition from highstand deposits A second focus is the early diagenetic alteration and cementation of these sediments with their high diagenetic potential This book contributes to and discusses new developments in carbonate sedimentology such as the concepts of highstand shedding and early burial diagenesis which also have an impact on reservoir studies
