Electronic Boy From The Portmanteau:

Electronic Boy from the Portmanteau Yevgeny Veltistov, 2002-12-01 You've probably guessed what Electronic is. Right? He's a boy robot. But the cream of the joke is that by sheer chance he turns out to be the live double of a schoolboy Sergei Cheesekov. They meet and make friends and immediately fantastic and funny adventures happen to them both. Sergei quickly gains fame as a World Champion runner, an animal trainer, and an honor pupil at school, but that's enough. Read the book yourselves and join Sergei and Electronic at a math lesson in a Moscow school, see the circus with them, and visit the cybernetics laboratory of Professor Gromov. Finally, when the cat's out of the bag and their secret is discovered, join the children who teach Electronic to laugh. Wouldn't it be fun if you had a friend like Electronic?

In *Motion and Representation* Nicol's Salazar Sutil considers the representation of human motion through languages of movement and technological mediation. He argues that technology transforms the representation of movement and that representation in turn transforms the way we move and what we understand to be movement. Humans communicate through movement physically and mentally. To record and capture integrated movement both bodily and mental by means of formal language and technological media produces a material record and cultural expression of our evolving kinetic minds and identities. Salazar Sutil considers three forms of movement inscription: a written record, notation, a visual record, animation, and a computational record, motion capture. He focuses on what he calls kinetic formalism: formalized movement in such pursuits as dance, sports, live animation, and kinetic art, as well as abstract definitions of movement in mathematics and computer science. He explores the representation of kinetic space and spatiotemporality, the representation of mental plans of movement, movement notation including stave notation, Labanotation, and such contemporary forms of notation as Choreographic Language Agent and the impact of digital technology on contemporary representations of movement in particular motion capture technology and Internet transfer.

protocols Motion and Representation offers a unique cultural theory of movement and of the ever changing ways of representing movement *Cybercrime* Susan W. Brenner,2010-02-26 This fascinating and timely book traces the emergence and evolution of cybercrime as an increasingly intransigent threat to society Cybercrime Criminal Threats from Cyberspace is intended to explain two things what cybercrime is and why the average citizen should care about it To accomplish that task the book offers an overview of cybercrime and an in depth discussion of the legal and policy issues surrounding it Enhancing her narrative with real life stories author Susan W Brenner traces the rise of cybercrime from mainframe computer hacking in the 1950s to the organized professional and often transnational cybercrime that has become the norm in the 21st century She explains the many different types of computer facilitated crime including identity theft stalking extortion and the use of viruses and worms to damage computers and outlines and analyzes the challenges cybercrime poses for law enforcement officers at the national and international levels Finally she considers the inherent tension between improving law enforcement s ability to pursue cybercriminals and protecting the privacy of U S citizens

Distracted Robert Rosenberger,2024-06-25 Applying insights from philosophy and cognitive science to address the urgent issue of smartphone induced distracted driving Although the dangers of texting while driving are widely known many people resist the idea that phone usage will impair their driving And connectivity features in new cars have only made using technology behind the wheel more tempting What will it take to change people s minds and behavior Robert Rosenberger contends that a better understanding of why this combination of technologies is so dangerous could effectively adjust both habits and laws Rosenberger brings together ideas from philosophy and cognitive science to leverage a postphenomenological perspective that reveals how our smartphones make us such bad drivers Reviewing decades of empirical studies in cognitive science he shows that we have developed habits of perception regarding our compulsive technology use habits that may wrest our attention away from the road Distracted develops innovative concepts for understanding technology related habits and the ways that our relationships to our devices influence how we perceive the world In turn these ideas can help drivers be more cognizant of the effect that smartphone usage has on their perceptions better inform efforts to enact stricter regulations and help us all to be more reflective about the technologies that shape our lives

Environmental Criticism for the Twenty-First Century Stephanie LeMenager,Teresa Shewry,Ken Hiltner,2011-05-09 Environmental Criticism for the Twenty First Century showcases the recent explosive expansion of environmental criticism which is actively transforming three areas of broad interest in contemporary literary and cultural studies history scale and science With contributors engaging texts from the medieval period through the twenty first century the collection brings into focus recent ecocritical concern for the long durations through which environmental imaginations have been shaped Contributors also address problems of scale including environmental institutions and imaginations that complicate conventional rubrics such as the national local and global Finally this collection brings together a set of scholars

who are interested in drawing on both the sciences and the humanities in order to find compelling stories for engaging ecological processes such as global climate change peak oil production nuclear proliferation and food scarcity Environmental Criticism for the Twenty First Century offers powerful proof that cultural criticism is itself ecologically resilient evolving to meet the imaginative challenges of twenty first century environmental crises
