Delavigne, J. Daniel Robertson, 1994 Increasingly the demise of many businesses and organizations is being blamed on current western management practice which can be traced directly back to the 19th century and Frederick Taylor's theory of scientific management Although W Edwards Deming proposed a new more modern philosophy of management decades ago the western world instead continued to practice Taylor's philosophy by now adulterated and corrupted many times over into a new form of its own neo Taylorism This volume explores in depth neo Taylorism where it came from and what its beliefs are Deming's philosophy his system of profound knowledge and his 14 points and suggests how Deming's philosophy if adopted could be an antidote for today's managerial ineffectiveness Shows organization and technical managers how to change using Deming's principles in order to improve quality in delivered services and products and in employee satisfaction Analyzes the flaws of Taylorism and Neo Taylorism with point by point comparison with Deming's philosophy Clearly explains the Deming quality philosophy from a conceptual framework that can then be applied rather than from a recipe or case study format which has proven to be ineffective For Executive and Technical Managers all industries Quality Managers and Practitioners Quality Productivity Organizational Development Consultants *The Source*, 1991 Transition of Youth & Young Adults with Emotional Or Behavioral Difficulties Hewitt B.
