The Barbarians Malcolm Todd, 1972 *Ancient Greece and Rome* Keith Hopwood, 1995 Sir Thomas Fairfax not Oliver Cromwell was creator and commander of Parliament's New Model Army from 1645 to 1650 Although Fairfax emerged as England's most successful commander of the 1640s this book challenges the orthodoxy that he was purely a military figure showing how he was not apolitical or disinterested in politics The book combines narrative and thematic approaches to explore the wider issues of popular allegiance puritan religion concepts of honour image reputation memory gender literature and Fairfax's relationship with Cromwell Black Tom delivers a groundbreaking examination of the transformative experience of the English revolution from the viewpoint of one of its leading yet most neglected participants It is the first modern academic study of Fairfax making it essential reading for university students as well as historians of the seventeenth century Its accessible style will appeal to a wider audience of those interested in the civil wars and interregnum more generally

The Laws of the Salian Franks, 2012-05-23 Following the collapse of the western Roman Empire the Franks established in northern Gaul one of the most enduring of the Germanic barbarian kingdoms They produced a legal code which they called the Salic law at approximately the same time that the Visigoths and Burgundians produced theirs but the Frankish code is the least Romanized and most Germanic of the three Unlike Roman law this code does not emphasize marriage and the family inheritance gifts and contracts rather Lex Salica is largely devoted to establishing fixed monetary or other penalties for a wide variety of damaging acts such as killing women and children striking a man on the head so that the brain shows or skinning a dead horse without the consent of its owner An important resource for students and scholars of medieval and legal history made available once again in Katherine Fischer Drew's expert translation the code contains much information on Frankish judicial procedure Drew has here rendered into readable English the Pactus Legis Salicae generally believed to have been issued by the Frankish King Clovis in the early sixth century and modified by his sons and grandson Childbert I Chlotar I and Chilperic I In addition she provides a translation of the Lex Salica Karolina the code as corrected and reissued some three centuries later by Charlemagne

separatists and the Ukrainian government NSAs weapons acquisition has been vital for the build up of their force enabling both the employment of that force and its sustainability While weapons are not necessarily the most important factor in military build up NSAs need weapons to fight and revolts usually erupt after the organizers have acquired a certain number of weapons Conversely many revolts lose momentum and operations are not carried out or turn ineffective due to shortages of arms and ammunition A major theme of this monograph is that in spite of dramatic political and technological changes armed NSAs in different periods have employed similar methods to acquire weapons Self production looting and stealing external support and the arms trade were always the major ways for NSAs to acquire weapons though the importance of each method and the type of arms has changed remarkably over time Understanding Non State Actors discusses the factors political social cultural technological and organizational that have both facilitated and constrained the ability of NSAs to acquire arms Especially lecturers and students of Military Terrorism Conflict studies War and peace studies will benefit from this study
