*Everyday Politics in the Philippines* Benedict J. Kerkvliet, 2002 Focusing on a rice farming village in central Luzon Kerkvliet argues that the faction and patron client relationships dealt with by conventional studies are only one part of Philippine political life The Power of Everyday Politics Benedict J. Kerkvliet, 2005 Ordinary people's everyday political behavior can have a huge impact on national policy that is the central conclusion of this book on Vietnam In telling the story of collectivized agriculture in that country Benedict J. Kerkvliet uncovers a history of local resistance to national policy and gives a voice to the villagers who effected change Not through open opposition but through their everyday political behavior villagers individually and in small unorganized groups undermined collective farming and frustrated authorities efforts to correct the problems *The Power of Everyday Politics* is an authoritative account based on extensive research in Vietnam's National Archives and in the Red River Delta countryside of the formation of collective farms in northern Vietnam in the late 1950s their enlargement during wartime in the 1960s and 1970s and their collapse in the 1980s As Kerkvliet shows the Vietnamese government eventually terminated the system but not for ideological reasons Rather collectivization had become hopelessly compromised and was ultimately destroyed largely by the activities of villagers Decollectivization began locally among villagers themselves national policy merely followed The power of everyday politics is not unique to Vietnam Kerkvliet asserts He advances a theory explaining how everyday activities that do not conform to the behavior required by authorities may carry considerable political weight Philippine Politics and Society in the Twentieth Century Eva-Lotta Hedman, John Sidel, 2005-11-29 The only book length study to cover the Philippines after Marco's downfall this key title thematically explores issues affecting this fascinating country throughout the last century Appealing to both the academic and non academic reader topics covered include national level electoral politics economic growth the Philippine Chinese law and order opposition the Left local and ethnic politics **Political Booms** Lynn T. White, 2009 Why have Taiwan rich parts of China and Thailand boomed famously while the Philippines has long remained stagnant both economically and politically Do booms abet democracy Does the rise of middle classes promise future liberalization Why has Philippine democracy brought no boom and barely served the Filipino people This book unlike previous books shows that both the roots and results of growth are largely political not just economic Specifically it pays attention to local not just national power networks that caused or prevented growth in the aforementioned countries Violence has been common in these politics along with money Elections have contributed to socio political problems that are also obvious in Leninist or junta regimes because elections are surprisingly easy to buy with corrupt money from government contracts Liberals should pay more serious theoretical attention to the effects of money on justice and Western political science should focus more clearly on the ways non state local power affects elections By considering the role of local money and power above all from small and medium sized firms that emerged after agrarian reforms on elections and justice this book asks democrats squarely

to face the extent to which electoral procedures have failed to help ordinary citizens. Students and scholars of Asia will all need this book as will students of the West whose methods have become parochial.

**Political Booms: Local Money And Power In Taiwan, East China, Thailand, And The Philippines** Lynn T White, 2009-06-10 Why have Taiwan, rich parts of China and Thailand boomed famously while the Philippines has long remained stagnant both economically and politically? Do booms abet democracy? Does the rise of middle classes promise future liberalization? Why has Philippine democracy brought no boom and barely served the Filipino people? This book, unlike most previous studies, shows that both the roots and results of growth are largely political rather than economic. Specifically, it pays attention to local, not just national, power networks that caused or prevented growth in the four places under consideration. Violence has been common in these polities along with money. Elections have contributed to socio-political problems that are also obvious in Leninist or junta regimes because elections are surprisingly easy to buy with corrupt money from government contracts. Liberals should pay more serious theoretical attention to the effects of money on justice and Western political science should focus more clearly on the ways non-state local power affects elections. By considering the effects on fair justice of local money and power, largely from small and medium-sized firms that emerge after agrarian reforms, this book asks democrats to face squarely the extent to which electoral procedures fail to help ordinary citizens. Students and scholars of Asia will all need this book as will students of the West whose methods have become parochial.

Agricultural Land Redistribution Hans P. Binswanger-Mkhize, Camille Bourguignon, Rogerius Johannes Eugenius van den Brink, 2009-01-01 Despite 250 years of land reform all over the world, important land inequalities remain, especially in Latin America and Southern Africa. While in these countries there is near consensus on the need for redistribution, much controversy persists around how to redistribute land peacefully and legally, often blocking progress on implementation. This book focuses on the how of land redistribution in order to forge greater consensus among land reform practitioners and enable them to make better choices on the mechanisms of land reform. Reviews and case studies describe and analyze the

Organizing for Democracy G. Sidney Silliman, Lela Garner Noble, 1998-05-01 The number, variety, and political prominence of non-governmental organizations in the Philippines present a unique opportunity to study citizen activism. Nearly 60,000 in number, by some estimates, grassroots and support organizations promote the interests of farmers, the urban poor, women, and indigenous peoples. They provide an avenue for political participation and a mechanism unequalled elsewhere in Southeast Asia for redressing the inequities of society. *Organizing for Democracy* brings together the most recent research on these organizations and their programs in the first book addressing the political significance of NGOs in the Philippines.

*Communal Intimacy and the Violence of Politics* Steffen Bo Jensen, Karl Hapal, 2022-05-15 *Communal Intimacy and the Violence of Politics* explores the notoriously brutal Philippine war on drugs from below. Steffen Bo Jensen and Karl Hapal examine how the war on drugs folded itself into communal and intimate spheres in one Manila neighborhood. Bagong Silang. Police killings have been regular occurrences.

since the birth of Bagong Silang Communal Intimacy and the Violence of Politics shows that although the drug war was introduced from the outside it fit into and perpetuated already existing gendered and generational structures In Bagong Silang the war on drugs implicated local structures of authority including a justice system that had always been deeply integrated into communal relations The ways in which the war on drugs transformed these intimate relations between the state and its citizens and between neighbors may turn out to be the most lasting impact of Duterte s infamously violent policies

**Frontier Livelihoods** Sarah Turner,Christine Bonnin,Jean Michaud,2015-05-01 Do ethnic minorities have the power to alter the course of their fortune when living within a socialist state In Frontier Livelihoods the authors focus their study on the Hmong known in China as the Miao in the Sino Vietnamese borderlands contending that individuals and households create livelihoods about which governments often know little The product of wide ranging research over many years Frontier Livelihoods bridges the traditional divide between studies of China and peninsular Southeast Asia by examining the agency dynamics and resilience of livelihoods adopted by Hmong communities in Vietnam and in China s Yunnan Province It covers the reactions to state modernization projects among this ethnic group in two separate national jurisdictions and contributes to a growing body of literature on cross border relationships between ethnic minorities in the borderlands of China and its neighbors and in Southeast Asia more broadly

*Women, Agency, and the State in Guinea* Carole Ammann,2020-03-05 This book examines how women in Guinea articulate themselves politically within and outside institutional politics It documents the everyday practices that local female actors adopt to deal with the continuous economic political and social insecurities that emerge in times of political transformations Carole Ammann argues that women s political articulations in Muslim Guinea do not primarily take place within women s associations or institutional politics such as political parties but instead women s silent forms of politics manifest in their daily agency that is when they make a living study marry meet friends raise their children and do household chores The book also analyses the relationship between the female population and the local authorities and discusses when and why women s claim making enjoys legitimacy in the eyes of other men and women as well as representatives of traditional authorities and the local government Paying particular attention to intersectional perspectives this book will be of interest to scholars of African studies social anthropology political anthropology the anthropology of gender urban anthropology gender studies and Islamic studies

**Democratic Equilibrium** Michael W. Fowler, 2015-11-12 Democratic Equilibrium The Supply and Demand of Democracy defines a model for political change change that results in either an increase or decrease in democracy The book presents a model that builds upon the existing literature to bridge several major gaps in political change theory This book provides a holistic supply and demand model that draws upon works from political science economics and history The work conducts an econometric test of the model and validates the results with field research cases from Mexico the Philippines and Senegal The econometric chapter is a rare quantitative analysis of the effects of violence and development upon democracy This topic is central to contemporary academic and policy debates about how to create democracies consolidate democracies achieve development and improve security especially within developing countries This topic is especially timely as the Arab Spring represents a unique opportunity and challenge for democratic change across the Middle East and North Africa Recent events in Tunisia and Egypt demonstrate that democracy studies remain just as relevant today as they were twenty years ago The findings indicate that common structural explanations of democracy are incomplete since the structural relationships are not stable or constant over time Instead democratic change or lack thereof can be explained using a supply and demand model Key actors including the military political parties NGOs the ruling regime and civil society are the suppliers and consumers that determine a country s resulting level of democracy However stating that actors are important is a major over simplification Each key actor builds preferences based upon a variety of factors most

importantly security income and the adoption of democratic norms It is this key dynamic that explains why insurgency poverty and under development do not have a linearly negative effect on democracy Instead these factors have a centripetal effect on political development pulling a country s government towards an intermediate state of political transition in which regimes stagnate in a partially democratic partially autocratic regime type Conversely the model also explains why high income democratic norms and security do not necessarily lead to democratization in all cases
