during the second half of the twentieth century might arguably be called the world's largest language engineering project. In this comprehensive study Dr Adamson examines a part of that project by charting the twists and turns of English language education from the pre-revolutionary period to the present. He successfully illustrates how tensions in China's massive educational system are negotiated from center to periphery, how textbook writers adapt to the socio-political mandates of their time to construct formal school curricula. Adamson also raises significant questions regarding the contradictions inherent in Chinese globalization.

Heidi Ross, Professor, Department of Educational Leadership and Policy Studies, School of Education, Indiana University at Bloomington

Bob Adamson has provided in this book one of the first detailed studies published in English of the history of a school subject in the PRC. The study provides fascinating insights into the changing nature of the English curriculum, the shifting socio-political context of the PRC and their complex inter-relationships.

Paul Morris, President, The Hong Kong Institute of Education

The learning of English is a crucial aspect of China's opening up to the world and increasingly prominent global role. This welcome volume provides an in-depth historical perspective on this important subject, including the recent periods of modernization (1978-1993) and globalization (1993 to the present). It should be compelling reading for all those involved with contemporary China across a wide spectrum of areas.
