**Everyday things in Ancient Greece** Rev e 54 Marjorie Quennell,1954 *Slaves and Other Objects* Page duBois,2008-03-15 Page duBois a classicist known for her daring and originality turns in this new book to one of the most troubling subjects in the study of antiquity the indispensability of slaves in ancient Greece DuBois argues that every object and text in the world of ancient Greece bears the marks of slavery and the need to reiterate the distinction between slave and free And yet the ubiquity of slaves in ancient societies has been overlooked by scholars who idealize antiquity misconstrued by those who view slavery through the lens of race and obscured by the split between historical and philological approaches to the classics DuBois begins her study by exploring the material culture of slavery including how most museum exhibits erase the presence of slaves in the classical world Shifting her focus to literature she considers the place of slaves in Plato s Meno Aristotle s Politics Aesop s Fables Aristophanes Wasps and Euripides Orestes She contends throughout that portraying the difference between slave and free as natural was pivotal to Greek concepts of selfhood and political freedom and that scholars who idealize such concepts too often fail to recognize the role that slavery played in their articulation Opening new lines of inquiry into ancient culture *Slaves and Other Objects* will enlighten classicists and historians alike **The Ecology of Everyday Things** Mark Everard,2020-12-22 Nature is all around us in the beautiful but also in the unappealing and functional and from the awe inspiring to the mundane It is vital that we learn to see the agency of the natural world in all things that make our lives possible comfortable and profitable *The Ecology of Everyday Things* pulls back the veil of our familiarity on a range of everyday things that surround us and which we perhaps take too much for granted This key into the magic world of the everyday can enable us to take better account of our common natural inheritance Professor James Longhurst Assistant Vice Chancellor University of the West of England UWE Bristol For many people ecosystems may be a remote concept yet we eat drink breathe and interface with them in every moment of our lives In this engaging textbook ecosystems scientist Dr Mark Everard considers a diversity of everyday things including fascinating facts about their ecological origins from the tea we drink to the things we wear read and enjoy to the ecology of communities and space flight and the important roles played by germs and unappealing creatures such as slugs and wasps In today s society we are so umbilically connected to ecosystems that we fail to notice them and this oversight blinds us to the unsustainability of

everyday life and the industries and policy environment that supports it The Ecology of Everyday Things takes the reader on an enlightening fascinating voyage of discovery all the while soundly rooted in robust science It will stimulate awareness about how connected we all are to the natural world and its processes and how important it is to learn to better treat our environment Ideal for use in undergraduate and school level teaching it will also interest educate engage and enthuse a wide range of less technical audiences      **Empire of Ancient Greece** Jean Kinney Williams,2009 Examines Greek civilization and describes how its people and society created the cultural basis of the Western world      *The Architecture of the Renaissance in France* William Henry Ward,1926
