Everyone Here Spoke Sign Language:

EVERYONE HERE SPOKE SIGN LANGUAGE Nora Ellen GROCE, 2009-06-30 From the seventeenth century to the early years of the twentieth the population of Martha's Vineyard manifested an extremely high rate of profound hereditary deafness. In stark contrast to the experience of most deaf people in our own society the Vineyarders who were born deaf were so thoroughly integrated into the daily life of the community that they were not seen and did not see themselves as handicapped or as a group apart. Deaf people were included in all aspects of life such as town politics, jobs, church affairs and social life. How was this possible? On the Vineyard hearing and deaf islanders alike grew up speaking sign language. This unique sociolinguistic adaptation meant that the usual barriers to communication between the hearing and the deaf which so isolate many deaf people today did not exist. *Everyone Here Spoke Sign Language* Nora Ellen Groce, 2001 "Everyone Here Spoke Sign Language" Nora Ellen Groce, American Museum of Natural History, 1980 Islanders of Martha's Vineyard once brought the deaf into all day to day work and play. *Understanding Deaf Culture* Paddy Ladd, 2003 This text presents a Traveller's Guide to deaf culture starting from the premise that deaf cultures have an important contribution to make to other academic disciplines and human lives in general. Within and outside deaf communities there is a need for an account of the new concept of deaf culture which enables readers to assess its place alongside work on other minority cultures and multilingual discourses. The book aims to assess the concepts of culture on their own terms and in their many guises and to apply these to deaf communities. The author illustrates the pitfalls which have been created for those communities by the medical concept of deafness and contrasts this with his new concept of deafhood a process by which every deaf child, family and adult implicitly explains their existence in the world to themselves and each other. A Philosophical Disease Carl Elliott, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis, an information company. Oxford Handbook of Deaf Studies, Language, and Education Marc Marschark, Patricia Elizabeth Spencer, 2005 This title is a major professional reference work in the field of deafness research. It covers all important aspects of deaf studies: language, social, psychological, issues, neuropsychology, culture, technology and education. **Open Your Eyes** H-Dirksen L. Bauman, 2013-11-30 This groundbreaking volume introduces readers to the key concepts and debates in deaf studies, offering perspectives on the relevance and richness of deaf ways of being in the world. In *Open Your Eyes* leading and emerging scholars, the majority of whom are deaf, consider physical and cultural boundaries of deaf places and probe the complex intersections of deaf identities with gender, sexuality, disability, family and race. Together they explore the role of sensory perception in constructing community, redefine literacy in light of signed languages and delve into the profound medical, social and political dimensions of the disability label often assigned to deafness. Moving beyond proving the existence of deaf culture, *Open Your Eyes* shows how the culture contributes vital insights on issues of identity, language and power and ultimately challenges our culture's obsession with normalcy. Making All the Difference Martha Minow, 2016-10-01 Should a court order medical treatment for a severely disabled newborn in the face of the parents refusal to authorize it How does the law apply to a neighborhood that objects to a group home for developmentally disabled people Does equality mean treating everyone the same even if such treatment affects some people adversely Does a state requirement of employee maternity leave serve or violate the commitment to gender equality Martha Minow takes a hard look at the way our legal system functions in dealing with people

on the basis of race gender age ethnicity religion and disability Minow confronts a variety of dilemmas of difference resulting from contradictory legal strategies strategies that attempt to correct inequalities by sometimes recognizing and sometimes ignoring differences Exploring the historical sources of ideas about difference she offers challenging alternative ways of conceiving of traits that legal and social institutions have come to regard as different She argues in effect for a constructed jurisprudence based on the ability to recognize and work with perceptible forms of difference Minow is passionately interested in the people different people whose lives are regularly mis shaped and mis directed by the legal system s ways of handling them Drawing on literary and feminist theories and the insights of anthropology and social history she identifies the unstated assumptions that tend to regenerate discrimination through the very reforms that are supposed to eliminate it Education for handicapped children conflicts between job and family responsibilities bilingual education Native American land claims these are among the concrete problems she discusses from a fresh angle of vision Minow firmly rejects the prevailing conception of the self that she believes underlies legal doctrine a self seen as either separate and autonomous or else disabled and incompetent in some way In contrast she regards the self as being realized through connection capable of shaping an identity only in relationship to other people She shifts the focus for problem solving from the different person to the relationships that construct that difference and she proposes an analysis that can turn difference from a basis of stigma and a rationale for unequal treatment into a point of human connection The meanings of many differences can change when people locate and revise their relationships to difference she asserts The student in a wheelchair becomes less different when the building designed without him in mind is altered to permit his access Her book evaluates contemporary legal theories and reformulates legal rights for women children persons with disabilities and others historically identified as different Here is a powerful voice for change speaking to issues that permeate our daily lives and form a central part of the work of law By illuminating the many ways in which people differ from one another this book shows how lawyers political theorist teachers parents students every one of us can make all the difference

Illusions of Equality Robert M. Buchanan,1999 The residential schools for deaf students established in the nineteenth century favored a bilingual approach to education that stressed the use of American Sign Language while also recognizing the value of learning English But the success of this system was disrupted by the rise of oralism with its commitment to teaching deaf children speech and its ban of sign language Buchanan depicts the subsequent ramifications in sobering terms most deaf students left school with limited educations and abilities that qualified them for only marginal jobs He also describes the insistence of the male hierarchy in the deaf community on defending the tactics of individual responsibility through the end of World War II a policy that continually failed to earn job security for Deaf workers BOOK JACKET
