Everything's Eventual ,2004

Everything's Eventual ,2004 **Damned If You Do** Margaret S. Hrezo, John M. Parrish, 2010-03-18 Problems of individual moral choice have always been closely bound up with the larger normative concerns of political theory There are several reasons for this continuing connection First the value conflicts involved in private moral choice often find themselves reproduced on the public stage for example states may find it difficult to do right by both justice and mercy in much the same way individuals do Second we frequently find conflicts among the values at stake in individual life and public life such that the moral choice we must make is between private and public goods Loosely speaking choices which express these conflicts are what philosophers call moral dilemmas choices in which no matter what one does one will be forfeiting some important moral good in which wrongdoing is to some degree inescapable in which one is perhaps literally damned if one does and damned if one doesn't The eight essays collected in this volume explore the philosophical problem of moral dilemmas as that problem finds expression in ancient drama classic and contemporary novels television film and popular fiction They consider four main types of dilemmas In the first section the authors examine dilemmas associated with political stability and regime change as expressed in the HBO television series Deadwood and in Stephen King's novels and short stories The second section confronts dilemmas associated with public leadership considering the ethical conflicts in Aeschylus's classical dramas The Suppliants Tolkien's Lord of the Rings and in the contemporary FOX television series 24 In the volume's third section the authors examine dilemmas of institutional evil specifically slavery as they emerge in Harriet Beecher Stowe's classic novel Uncle Tom's Cabin and in J K Rowling's Harry Potter novels Finally the collection considers dilemmas of community and choice in Toni Morrison's novel Paradise and in the contemporary film A Simple Plan

Everything We Do Matters Venerable WuLing, EVERYTHING WE DO MATTERS In a land and time very distant from us two men encountered one another One was a Brahmin a Hindu priest He realized that the man he was looking at was no ordinary being and so he inquired Are you a god No Brahmin Are you an angel No Brahmin Are you a spirit No Brahmin What are you then I am awake replied the Buddha By his own assertion the Buddha was not a god He was an ordinary man living in a world engulfed in greed anger ignorance and delusion Twenty five hundred years ago when the Buddha was teaching what he had awoken to his world was similar in many ways to our world today There were great centers of culture and there were lands of stagnation There were rulers with great power who thirsted for even more and there were oppressed people who only wanted to live in peace There were men who said that they alone held the key to spiritual secrets and there were those who searched for different answers There were people who had great wealth and there were those who had nothing There were people who said we must change and there were those who denied there was anything wrong Perhaps that distant land and time is not that distant after all Greed anger ignorance and delusion are still very much with us In the world today we hear so much about conflict Economic conflict between the developed countries and third world countries Cultural conflict between the East and the West Sectarian conflict in the Middle East Ethnic conflict in Africa So much pride and arrogance so much hatred so much pain When even government leaders cannot peacefully resolve the world's problems what are we supposed to do How can we individuals without power or influence hope to accomplish anything positive in the face of such fury and intolerance

Social Physics and a Theory of Everything Tim Delaney, 2025-05-15 Social physics is a field that combines the academic disciplines of

physics and sociology Attempting a theory of everything from the social physics perspective provides us with the advantage of utilizing the knowledge already gained from the field of physics on certain matters such as the properties of the forces of nature while the field of sociology provides us with great insights into the role and actions of human behavior This book uses social physics to address major questions of human life These questions include what is the fate of humanity and specifically what role will artificial intelligence AI play Is there an afterlife and if yes what are the possible scenarios of an afterlife What is the fate of the planet Earth and what is the fate of our universe The Turning Point That Changed Everything Wallace R. Pratt,2009-12-08 In every person s life there comes a moment in time when circumstances or events require decisions and responses that greatly determine the future This book has no design to be another volume on leadership techniques Rather it is a candid exploration of those unexpected turns birthed out of the experience of being confronted with a reversal of circumstances in the life of an individual Frankly it is a study about the drama of life The intention of the author is to give a sincere and straightforward examination of why turnabouts often get high jacked and fail to live up to people s expectations Even more individuals will find a plea for courage and faith when things do not occur as they once envisioned they would Consequently it is a clarion call for courage to go further than some would desire but also a caution to impatient leaders to be watchful of their own intentions to push a change further than would be wise In the end some leaders must be willing to consider a more contemplative life built on valuing people above their own ideological mindset Dr Wallace R Pratt is an administrator minister teacher and writer He lives in Salem Oregon and has been married thirty eight years to his wonderful wife Judy They are blessed with two daughters two great son in laws and five grandchildren Dr Pratt serves as a regional supervisor in the Northwest for his church organization while also serving as an adjunct professor for Gordon Conwell Theological Seminary His leadership experience has included thirty three years of pastoral ministry and approximately eighteen years of teaching in sixteen nations He has been serving on the Doctrine and Polity Committee of his church organization for fourteen years and presently holds the position of chairman for this international body **‘Race Is Everything’** David Bindman,2023-06-26 A timely and revealing look at the intertwined histories of science art and racism Race Is Everything explores the spurious but influential ideas of so called racial science in the nineteenth and the first half of the twentieth centuries and how art was affected by it David Bindman looks at race in general but with particular concentration on attitudes toward and representations of people of African and Jewish descent He argues that behind all racial ideas of the period lies the belief that outward appearance and especially skull shape as studied in the pseudoscience of phrenology can be correlated with inner character and intelligence and that these could be used to create a seemingly scientific hierarchy of races The book considers many aspects of these beliefs including the skull as a racial marker ancient Egypt as a precedent for Southern slavery Darwin race and aesthetics the purported Mediterranean race the visual aspects of eugenics and the racial politics of Emil Nolde **Everything Is Predictable** Tom Chivers,2024-05-07 A fascinating witty

and perspective shifting Oliver Burkeman New York Times bestselling author tour of Bayes's theorem and its global impact on modern life from the acclaimed science writer and author of *The Rationalist's Guide to the Galaxy* At its simplest Bayes's theorem describes the probability of an event based on prior knowledge of conditions that might be related to the event But in *Everything Is Predictable* Tom Chivers lays out how it affects every aspect of our lives He explains why highly accurate screening tests can lead to false positives and how a failure to account for it in court has put innocent people in jail A cornerstone of rational thought many argue that Bayes's theorem is a description of almost everything But who was the man who lent his name to this theorem How did an 18th century Presbyterian minister and amateur mathematician uncover a theorem that would affect fields as diverse as medicine law and artificial intelligence Witty lively and best of all extremely nerdy Tim Harford author of *The Undercover Economist* *Everything Is Predictable* is an entertaining and accessible illustration of how a single compelling idea can have far reaching consequences
