Germany as a Culture of Remembrance Alon Confino, 2017-03-01 An acknowledged authority on German history and memory Alon Confino presents in this volume an original critique of the relations between nationhood memory and history applied to the specific case of Germany In ten essays three never before published and one published only in German Confino offers a distinct view of German nationhood in particular and of nationhood in general as a product of collective negotiation and exchange between the many memories that exist in the nation The first group of essays centers on the period from 1871 to 1990 and explores how Germans used conceptions of the local or Heimat to identify what it meant to be German in a century of ideological upheavals The second group of essays comprehensively critiques and analyzes the ways laypersons and scholars use the notion of memory as a tool to understand the past Arguing that the case of Germany contains particular characteristics with broader implications for the way historians practice their trade Germany as a Culture

Martijn van der Heide, Wim Heijman, 2013-01-03 This book aims to explore the avenue of landscape economics and provides the building blocks from different scientific disciplines for an economic analysis of landscapes What exactly constitutes and determines the value of a landscape It focuses on the value of landscapes in its broadest sense thereby covering a variety of topics including stakeholder involvement in landscape design landscape governance and landscape perceptions from different countries Merely saying that landscapes have value or are important is not sufficient not when resources are scarce and have alternative uses Measuring and quantifying the economic value of changes in landscapes would help ensure that landscape management decisions are both economically rational and sound ландшафт ландшафт ландшафт, Drora Dominey, ландшафт ландшафт, France Lebéé-Nadav, 2002 This thought provoking title examines monuments throughout Israel and their effect on visitors as well as their depiction of the events being memorialized The authors do not shrink from showing readers that although the monuments may be grand and inspiring the reality behind the actual events themselves is often harsh and difficult to face This volume takes a novel look at the history and deeds of a heroic country and its people *The Pictorial Turn* Neal Curtis, 2013-09-13 In 1992 W J T Mitchell argued for a pictorial turn in the humanities registering a renewed interest in and prevalence of pictures and images in what had been understood as an age of simulation or an increasingly extensive and

diverse visual culture However in what is often characterized as a society of the spectacle we still do not know exactly what pictures or images are what their relation to language is how they operate on observers and the world how their history is to be understood and what is to be done with or about them In this seminal collection of essays the first to be devoted to the pictorial turn theorists from across the humanities and social sciences representing the disciplines of art history philosophy geography media studies visual studies and anthropology are brought together with a paleontologist and practising artists to consider amongst other things the relation between pictures and images the power of landscape the nature of political images the status of images in the natural sciences the life of images and the pictorial uncanny With these topics in mind picture theory and iconology exceed in scope the objects of visual culture conventionally understood This book was published as a special issue of *Culture Theory and Critique*

Nationalism and the Israeli State Don Handelman, 2020-06-11 National festivals Military parades Patriotic memorials Such public events and tributes naturally bring to mind the idea of nationalism But what is the cultural logic behind them How does a country such as Israel facilitate state related public events as enactments of nationalism To answer these questions renowned anthropologist Don Handelman unpacks the meaning of national ritual and symbol in Israel today He argues that public events mirror social order a mirror that reflects to its participants and audiences the message that the designers of such events wish to communicate Handelman considers the meaning of Holocaust and military memorialism and he investigates the role of holiday celebrations especially how they affect young children first learning about their country Analyzing state ceremonies such as Holocaust Remembrance Day for the war dead and Independence Day he notes the absence of minorities and examines their significance in the promotion of a national identity He also looks at how Israel exports powerful symbols of statehood Throughout Handelman develops his theory of bureaucratic logic as the driving force behind expressions of nationalism in the modern state He argues that bureaucratic logic has a much wider cachet than simply functioning as a way of thinking

only about bureaucratic institutions The logic is crucial to how these institutions function but more so it is a dominant force in forming modern state social order Bureaucratic logic is used incessantly to invent and to modify all kinds of systems of classification that often have profound consequences for individuals and for groups and that are ritualized powerfully through a host of state related public events

Holocaust Memory Reframed Jennifer Hansen-Glucklich, 2014-03-31 Holocaust memorials and museums face a difficult task as their staffs strive to commemorate and document horror On the one hand the events museums represent are beyond most people's experiences At the same time they are often portrayed by theologians artists and philosophers in ways that are already known by the public Museum administrators and curators have the challenging role of finding a creative way to present Holocaust exhibits to avoid cliché or dehumanizing portrayals of victims and their suffering In *Holocaust Memory Reframed* Jennifer Hansen Glucklich

examines representations in three museums Israel's Yad Vashem in Jerusalem Germany's Jewish Museum in Berlin and the United States Holocaust Memorial Museum in Washington D C She describes a variety of visually striking media including architecture photography exhibits artifact displays and video installations in order to explain the aesthetic techniques that the museums employ As she interprets the exhibits Hansen Glucklich clarifies how museums communicate Holocaust narratives within the historical and cultural contexts specific to Germany Israel and the United States In Yad Vashem architect Moshe Safdie developed a narrative suited for Israel rooted in a redemptive Zionist story of homecoming to a place of mythic geography and renewal in contrast to death and suffering in exile In the Jewish Museum in Berlin Daniel Libeskind's architecture broken lines and voids emphasize absence Here exhibits communicate a conflicted ideology torn between the loss of a Jewish past and the country's current multicultural ethos The United States Holocaust Memorial Museum presents yet another lens conveying through its exhibits a sense of sacrifice that is part of the civil values of American democracy and trying to overcome geographic and temporal distance One well known example the pile of thousands of shoes plundered from concentration camp victims encourages the visitor to bridge the gap between viewer and victim Hansen Glucklich explores how each museum's concept of the sacred shapes the design and choreography of visitors' experiences within museum spaces These spaces are sites of pilgrimage that can in turn lead to rites of passage
