The Virtual Mummy Sarah Underhill Wisseman, 2003 The Virtual Mummy is a thoroughly readable introduction to the nondestructive techniques used by contemporary researchers to analyze the artifacts and culture of ancient Egypt It tells the captivating story of the virtual unwrapping of an Egyptian mummy and the interdisciplinary project that allowed researchers at the University of Illinois at Urbana Champaign to investigate the person inside by way of an autopsy performed by computer The mummy acquired by the university's Spurlock Museum in 1989 was from the Fayum region of Egypt and is dated to about 100 a d Although other mummy projects have used

destructive analytical techniques the Spurlock mummy was never even unwrapped Minute samples of loose material were taken for dating and for textile and wood analysis without affecting the integrity or display quality of the artifact Faculty and staff members from area hospitals and University of Illinois departments including classics anthropology chemistry textile sciences and entomology were recruited by the Program on Ancient Technologies and Archaeological Materials for the project The interdisciplinary team implemented a research plan that relied on medical imaging techniques including X rays and CT scans They also utilized for the first time in the history of mummy research a Cray II supercomputer at the university's National Center for Supercomputing Applications to render three dimensional images of the mummy's skull and body Replete with illustrations Sarah U Wisseman's engaging chronicle of teamwork and research gives readers the chance to experience how ancient history melded with contemporary technology The Virtual Mummy also includes a review of the development of mummification and a general history of mummy research *Parasites in Past Civilizations and their Impact upon Health* Piers D. Mitchell, 2023-04-06 This interdisciplinary volume brings together medicine and history to investigate the impact that parasites had upon past civilizations globally **Unwrapping Ancient Egypt** Christina Riggs, 2014-04-10 First runner up for the British Kuwait Friendship Society Book Prize in Middle Eastern Studies 2015 In ancient Egypt wrapping sacred objects including mummified bodies in layers of cloth was a ritual that lay at the core of Egyptian society Yet in the modern world attention has focused instead on unwrapping all the careful arrangements of linen textiles the Egyptians had put in place This book breaks new ground by looking at the significance of textile wrappings in ancient Egypt and at how their unwrapping has shaped the way we think about the Egyptian past Wrapping mummified bodies and divine statues in linen reflected the cultural values attached to this textile with implications for understanding gender materiality and hierarchy in Egyptian society Unwrapping mummies and statues similarly reflects the values attached to Egyptian antiquities in the West where the colonial legacies of archaeology Egyptology and racial science still influence how Egypt appears in museums and the press From the tomb of Tutankhamun to the Arab Spring Unwrapping Ancient Egypt raises critical questions about the deep seated fascination with this culture and what that fascination says about our own
