Evil Clonation:

Evil Clonation Heriberto Cintron, 2005-08 His professors commented on Arthur being an extremely gifted person or a genius of some sort but nobody knew what was happening with his genetically transmitted legacy of Adolf Hitler Arthur started to change little by little typically saluting like Hitler again to his classmates and teachers He himself could not explain what he was doing and he even tried to unsuccessfully correct himself P When he was out of University he rented movies of the Second World War and documentaries of Hitler While seeing videos of the Holocaust and documentaries of the crimes committed in the Nazi Death camps he commented to his mother Mother I still cannot understand why there was so much hatred towards the Hebrew race If I had all the power that this man had I would have conquered the world in a pacific way just by using the advanced technology that Germany possessed However Hitler s personality attracts me so much that I do not know what happens to me and sometimes I even feel and think like him But I do not share his anti humanistic views

Who's Afraid of Human Cloning? Gregory E. Pence, 1998-11-05 Human cloning raises the most profound questions about human nature our faith in ourselves and our ability to make decisions that could significantly alter the character of humanity In this exciting and accessible book Gregory Pence offers a candid and sometimes humorous look at the arguments for and against human cloning Originating a human being by cloning Pence boldly argues should not strike fear in our hearts but should be examined as a reasonable reproductive option for couples Pence considers how popular culture has influenced the way we think about cloning and he presents a lucid and non technical examination of the scientific research and relevant moral issues in the cloning debate This book is a must read for anyone who is concerned about the impact of technology on human life and for those with interests in medical ethics sociology and public policy Human Cloning Kerry Lynn Macintosh, 2012-10-29 Since Dolly the sheep was born controversy has swirled around the technology of cloning We recoil at the prospect of human copies manufactured men and women nefarious impersonators and resurrections of the dead Such reactions have serious legal consequences lawmakers have banned stem cell research along with the cloning of babies But what if our minds have been playing tricks on us What if everything we thought we knew about human cloning is rooted in intuition rather than fact Human Cloning Four Fallacies and their Legal Consequences is a rollicking ride through science psychology and the law Drawing on sources ranging from science fiction films to the Congressional Record this book unmasks the role that psychological essentialism has played in bringing about cloning bans It explains how hidden intuitions have caused conservatives and liberals to act contrary to their own most cherished ideals and values *Illegal Beings* Kerry Lynn Macintosh, 2005-08-01 Many people think human reproductive cloning should be a crime In America some states have already outlawed cloning and Congress is working to enact a national ban Meanwhile scientific research continues both in America and abroad and soon reproductive cloning may become possible If that happens cloning cannot be stopped Infertile couples and others will choose to have babies through cloning even if they have to break the law This book explains that the

most common objections to cloning are false or exaggerated The objections reflect and inspire unjustified stereotypes about human clones and anti cloning laws reinforce these stereotypes and stigmatize human clones as subhuman and unworthy of existence This injures not only human clones but also the egalitarianism upon which our society is based Applying the same reasoning used to invalidate racial segregation this book argues that anti cloning laws violate the equal protection guarantee and are unconstitutional
