Evolution As Revelation:

Evolution as Revelation Jacob Kohn,1963 Modern Ideas of Evolution as Related to Revelation and Science Sir John William Dawson,1906 Evolution: Genesis and Revelations C. Leon Harris,1981-06-30 In this comprehensive history of evolutionism C Leon Harris has combined primary source readings with clear pertinent background information to provide a solid basic understanding of the ways scientists have arrived at today s views of evolution Harris describes the major contributors to the theory of evolutionism placing each in the context of the general cultural influences to which he was exposed Each chapter also contains an explanation of the philosophical basis of the scientific approach of the period in question A lengthy bibliography provides direction for further reading on this important and timely subject Modern Ideas of Evolution as Related to Revelation and Science Sir John William Dawson,1892 **Evolution and revelation, a sketch of Darwin's theory, and a short comparison thereof, with the Bible account of Creation** George Martius MacDermott,1897 Modern Ideas of Evolution as Related to Revelation and Science (1890) John William Dawson,2008-06-01 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work *Modern Ideas of Evolution As Related to Revelation and Science* John William Dawson,2019-09-25 Darwin s theory of evolution generated a storm of controversy within the scientific community in the later nineteenth century and Sir J William Dawson a renowned geologist of his time was one of those who vehemently opposed it In *Modern Ideas of Evolution as related to Revelation and Science* first published in 1890 Dawson maintains that it is religion alone that forms a stable base for all new ideas He dismisses the theory of evolution as a crude and heretical hypothesis inconsistent with religion and undeserving of acceptance If adopted as proven truth he argues it would lead to unscientific and unspiritual degeneration of the mind More than a century later evolution is generally accepted but still not proven and the debates continue Dawson s energetic polemic remains a key document for historians of science concerned with the Victorian reception of Darwinism and the rise of evolutionary theory **Modern Ideas of Evolution as Related to Revelation and Science** John William Dawson,2021-03-10 Darwin s theory of evolution generated a storm of controversy within the scientific community in the later nineteenth century and Sir J William Dawson a renowned geologist of his time was one of those who vehemently opposed it In *Modern Ideas of Evolution as related to Revelation and Science* first published in 1890 Dawson maintains that it is religion alone that forms a stable base for all new ideas He dismisses the theory of evolution as a crude and heretical hypothesis inconsistent with religion and undeserving of acceptance If adopted as proven truth he argues it would lead to unscientific and unspiritual degeneration of the mind More than a century later evolution is generally accepted but still not proven and the debates continue Dawson s energetic polemic remains a key

document for historians of science concerned with the Victorian reception of Darwinism and the rise of evolutionary theory

Resonances: Neurobiology, Evolution and Theology Markus Mühling, 2014-09-17 Markus Mühling presents an epistemological theory of revelation as perception and a relational narrative theological ontology based on the concept of dramatic coherence in which the triune life is understood not as an anomaly within ontology but rather as the decisive condition of its possibility Mühling further demonstrates that potential for resolving certain theological problems arises if new insights from the natural sciences such as the theory of the ecological brain in the neurosciences and the theory of niche construction in evolutionary theory are taken into account Similarly he also proposes that neuroscience and evolutionary biology can procure advantages from a dialogue with theology **The Princeton Theological Review**, 1910 **Evolution and Ethics** Philip Clayton, Jeffrey Schloss, 2004-08-04 Certain to engage scholars students and general readers alike *Evolution and Ethics* offers a balanced levelheaded constructive approach to an often divisive debate Modern Ideas of Evolution J. Davis, 1982 **The London Quarterly Review** William Lonsdale Watkinson, William Theophilus Davison, 1908 *Evolution, Chance, and God* Brendan Sweetman, 2015-10-22 *Evolution Chance and God* looks at the relationship between religion and evolution from a philosophical perspective This relationship is fascinating complex and often very controversial involving myriad issues that are difficult to keep separate from each other *Evolution Chance and God* introduces the reader to the main themes of this debate and to the theory of evolution while arguing for a particular viewpoint namely that evolution and religion are compatible and that contrary to the views of some influential thinkers there is no chance operating in the theory of evolution a conclusion that has great significance for teleology One of the main aims of this book is not simply to critique one influential contemporary view that evolution and religion are incompatible but to explore specific ways of how we might understand their compatibility as well as the implications of evolution for religious belief This involves an exploration of how and why God might have created by means of evolution and what the consequences in particular are for the status of human beings in creation and for issues such as free

will the objectivity of morality and the problem of evil By probing how the theory of evolution and religion could be reconciled Sweetman says that we can address more deeply key foundational questions concerning chance design suffering and morality and God s way of acting in and through creation

Modern Ideas of Evolution J. William Dawson,2015-06-24

Excerpt from Modern Ideas of Evolution As Related to Revelation and Science The author has reason to thank the critics for their fair and kindly treatment of this work A few it is true of the more zealous Darwinians have reviled him as a blasphemer of their idol and one or two have adopted the unfair tactics of taking from their connection incidental references to facts and attaching to them meanings they were not intended to bear as a foundation for the accusation of untruthfulness or ignorance In the present edition a few passages used in this way have been re written so as to make them more plain and also to strengthen the general argument It is however impossible altogether to guard any writing from wilful misrepresentation of this kind The other additions are chiefly references to points raised in very recent discussions About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
