Evolution's Way Todd F. Ekof,2020-04-01 We are living in a time of exponential changes due to the rapid evolution of technology far outpacing that of our biology Extraordinary as they seem however these changes are expressions of the natural evolutionary processes that have been occurring since the Universe began Evolution s Way shows us how this all pervasive force shapes and moves the Universe and everything within it from the first stars to the first cells from humans to their machines toward increasingly greater states of complexity awareness and unity As nature s toolmakers moreover humanity and its machines have brought the entire Universe to a sudden point of transformation that s about to change everything Humans like all creatures are creatures of habit which means sudden changes can feel threatening to us But Evolution s Way helps sooth our nerves by elucidating the spiritual dimensions of evolution while reminding us we too are an intricate and beautiful part of nature s drive toward transcendence **The Little Cyclopedia of Mormonism ...** John

Giberson,2012-04-07 Like detectives sleuthing out the greatest mystery of all scientists over the centuries have uncovered clues about the structure and origins of the universe The work of Galileo Newton Einstein and a host of other tenacious researchers and thinkers reveals a cosmos of almost unimaginable wonder and beauty If we then honestly follow the evidence of science wherever it leads where do we end up Karl Giberson takes us on a fascinating guided tour of planets and protons galaxies and gamma rays We discover that if gravity were slightly stronger neutrons a tiny bit lighter the size of our sun somewhat larger or a dozen other factors altered by fractions there would be no life The author shows that for many observers even those who do not embrace religious faith all of this looks suspiciously like the expression of a grand plan a cosmic architecture capable of both supporting life such as ours and inspiring observers like us to seek out hints of a creator Join this cosmic expedition and discover the wonder of it all
