REVISED AND UPDATED EDITION

Evolution Of Desire Strategies Of Human Mating

Irving B. Weiner, W. Edward Craighead

Evolution Of Desire Strategies Of Human Mating:

The Evolution of Desire David M. Buss, 2016-12-27 A drop dead shocker Washington Post Book World that uses evolutionary psychology to explain human mating and the mysteries of love If we all want love why is there so much conflict in our most cherished relationships To answer this question we must look into our evolutionary past argues prominent psychologist David M Buss Based one of the largest studies of human mating ever undertaken encompassing more than 10 000 people of all ages from thirty seven cultures worldwide *The Evolution of Desire* is the first work to present a unified theory of human mating behavior Drawing on a wide range of examples of mating behavior from lovebugs to elephant seals from the Yanomam tribe of Venezuela to online dating apps Buss reveals what women want what men want and why their desires radically differ Love has a central place in human sexual psychology but conflict competition and manipulation also pervade human mating something we must confront in order to control our own mating destiny Updated to reflect the very latest scientific research on human mating this definitive edition of this classic work of evolutionary psychology explains the powerful forces that shape our most intimate desires

The Story of Food in the Human Past Robyn E.

Cutright, 2021-01-26 A sweeping overview of how and what humans have eaten in their long history as a species *The Story of Food in the Human Past* How What We Ate Made Us Who We Are uses case studies from recent archaeological research to tell the story of food in human prehistory Beginning with the earliest members of our genus Robyn E Cutright investigates the role of food in shaping who we are as humans during the emergence of modern *Homo sapiens* and through major transitions in human prehistory such as the development of agriculture and the emergence of complex societies This fascinating study begins with a discussion of how food shaped humans in evolutionary terms by examining what makes human eating unique the use of fire to cook and the origins of cuisine as culture and adaptation through the example of Neandertals The second part of the book describes how cuisine was reshaped when humans domesticated plants and animals and examines how food expressed ancient social structures and identities such as gender class and ethnicity Cutright shows how food took on special meaning in feasts and religious rituals and also pays attention to the daily preparation and consumption of food as central to human society Cutright synthesizes recent paleoanthropological and archaeological research on ancient diet and cuisine and complements her research on daily diet culinary practice and special purpose mortuary and celebratory meals in the Andes with comparative case studies from around the world to offer readers a holistic view of what humans ate in the past and what that reveals about who we are

Brute Force Dominic Lennard, 2019-11-01

It s always been a wild world with humans telling stories of killer animals as soon as they could tell stories at all Movies are an especially popular vehicle for our fascination with fierce creatures In *Brute Force* Dominic Lennard takes a close look at a range of cinematic animal attackers including killer gorillas sharks snakes bears wolves spiders and even a few dinosaurs Lennard argues that animal horror is not so much a focused genre as it is an impulse tapping into age old fears of becoming

prey At the same time these films expose conflicts and uncertainties in our current relationship with animals Movies considered include King Kong Jaws The Grey Them Arachnophobia Jurassic Park Snakes on a Plane An American Werewolf in London and many more Drawing on insights from film studies art history cognitive science and evolutionary psychology Brute Force is an engaging critical exploration and appreciation of cinema s many bad beasts **EPSA Philosophy of Science:**

Creating Consilience Edward Slingerland, Mark Collard, 2012-01-19 Calls for a consilient or vertically integrated approach to the study of human mind and culture have for the most part been received by scholars in the humanities with either indifference or hostility One reason for this is that consilience has often been framed as bringing the study of humanistic issues into line with the study of non human phenomena rather than as something to which humanists and scientists contribute equally The other major reason that consilience has yet to catch on in the humanities is a dearth of compelling examples of the benefits of adopting a consilient approach Creating Consilience is the product of a workshop that brought together internationally renowned scholars from a variety of fields to address both of these issues It includes representative pieces from workshop speakers and participants that examine how adopting such a consilient stance informed by cognitive science and grounded in evolutionary theory would concretely impact specific topics in the humanities examining each topic in a manner that not only cuts across the humanities natural science divide but also across individual humanistic disciplines By taking seriously the fact that science humanities integration is a two way exchange this volume takes a new approach to bridging the cultures of science and the humanities The editors and contributors formulate how to develop a new shared framework of consilience beyond mere interdisciplinarity in a way that both sides can accept

The Handbook of Evolutionary Psychology, Volume 1 David M. Buss, 2015-09-29 The indispensable reference tool for the groundbreaking science of evolutionary psychology Why is the mind designed the way it is How does input from the environment interact with the mind to produce behavior These are the big unanswered questions that the field of evolutionary psychology seeks to explore The Handbook of Evolutionary Psychology is the seminal work in this vibrant quickly developing new discipline In this thorough revision and expansion luminaries in the field provide an in depth exploration of the foundations of evolutionary psychology and explain the new empirical discoveries and theoretical developments that continue at a breathtaking pace Evolutionary psychologists posit that the mind has a specialized and complex structure just as the body has a specialized and complex structure From this important theoretical concept arises the vast array of possibilities that are at the core of the field which seeks to examine such traits as perception language and memory from an evolutionary perspective This examination is intended to determine the human psychological traits that are the products of sexual and natural selection and as such to chart and understand human nature Join the discussion of the big questions addressed by the burgeoning field of evolutionary psychology Explore the foundations of evolutionary psychology from theory and methods to the thoughts of EP critics Discover the psychology of human survival mating parenting cooperation and conflict culture and more Identify how evolutionary psychology is interwoven with other academic subjects and traditional psychological disciplines The Handbook of Evolutionary Psychology is the definitive guide for every psychologist and student interested in keeping abreast of new ideas in this quickly developing field

The Caveman Mystique Martha McCaughey, 2008 Has evolution made men promiscuous skirt chasers Pop Darwinian claims about men s irrepressible heterosexuality have become increasingly common and increasingly common excuses for men s sexual

aggression The Caveman Mystique traces such claims about the hairier sex through evolutionary science and popular culture After outlining the social and historical context of the rise of pop Darwinism s assertions about male sexuality and their appeal to many men Martha McCaughey shows how evolutionary discourse can get lived out as the biological truth of male sexuality Although evolutionary scientists want to use their theories to solve social problems evolutionary narratives get invoked by men looking for a Darwinian defense of bad boy behaviors McCaughey argues that evolution has nearly replaced religion as a moral guide for understanding who we are and what we must overcome to be good people Bringing together insights from the fields of science studies body studies feminist theory and queer theory The Caveman Mystique offers a fresh understanding of science science popularization and the impact of science on men s identities making a convincing case for deconstructing rather than defending the caveman Handbook of Personality Oliver P. John, Richard W.
