

THE EVOLUTION OF HUMAN SOCIALITY

A DARWINIAN CONFLICT PERSPECTIVE

Stephen K. Sanderson

Evolution Of Human Sociality A Darwinian Conflict Perspective

G Orfield

Evolution Of Human Sociality A Darwinian Conflict Perspective:

The Evolution of Human Sociality Stephen K. Sanderson, 2001 This text attempts a broad theoretical synthesis within the field of sociology and its closely allied sister discipline of anthropology It draws together these disciplines theoretical approaches into a synthesized theory called Darwinian conflict theory Human Nature and the Evolution of Society Stephen K. Sanderson, 2018-05-04 If evolution has changed humans physically has it also affected human behavior Drawing on evolutionary psychology sociobiology and human behavioral ecology Human Nature and the Evolution of Society explores the evolutionary dynamics underlying social life In this introduction to human behavior and the organization of social life Stephen K Sanderson discusses traditional subjects like mating behavior kinship parenthood status seeking and violence as well as important topics seldom included in books of this type especially gender economies politics foodways race and ethnicity and the arts Examples and research on a wide range of human societies both industrial and nonindustrial are integrated throughout With chapter summaries of key points thoughtful discussion questions and important terms defined within the text the result is a broad ranging and comprehensive consideration of human society thoroughly grounded in an evolutionary perspective The Oxford Handbook of Evolution, Biology, and Society Dr. Rosemary Hopcroft, 2018-03-09 Evolution biology and society is a catch all phrase encompassing any scholarly work that utilizes evolutionary theory and or biological or behavioral genetic methods in the study of the human social group and The Oxford Handbook of Evolution Biology and Society contains an much needed overview of research in the area by sociologists and other social scientists The examined topics cover a wide variety of issues including the origins of social solidarity religious beliefs sex differences gender inequality determinants of human happiness the nature of social stratification and inequality and its effects identity status and other group processes race ethnicity and race discrimination fertility and family processes crime and deviance and cultural and social change The scholars whose work is presented in this volume come from a variety of disciplines in addition to sociology including psychology political science and criminology Yet as the essays in this volume demonstrate the potential of theory and methods from biology for illuminating social phenomena is clear and sociologists stand to gain from learning more about them and using them in their own work The theory focuses on evolution by natural selection the primary paradigm of the biological sciences while the methods include the statistical analyses sociologists are familiar with as well as other methods that they may not be familiar with such as behavioral genetic methods methods for including genetic factors in statistical analyses gene wide association studies candidate gene studies and methods for testing levels of hormones and other biochemicals in blood and saliva and including these factors in analyses This work will be of interest to any sociologist with an interest in exploring the interaction of biological and sociological processes As an introduction to the field it is useful for teaching upper level or graduate students in sociology or a related social science *New Evolutionary Social Science* Heinz-Jurgen Niedenzu, Tamas Meleggy, Peter Meyer, 2015-11-17 Social scientists have long declared their autonomy from the

natural sciences and in doing so have tended to neglect important biological constraints on human nature Many sociological theories have suggested a nearly complete malleability of patterns of social life The New Evolutionary Social Science challenges this view by building on Stephen K Sanderson s Darwinian conflict theory which sets out to synthesise sociological theories with key findings from biology into an overarching scientific paradigm Configuring and expanding this groundbreaking theory the contributors to this volume are well known European and American experts in evolutionary science The New Evolutionary Social Science develops a new basis for understanding social change and the world s future through a better integration of the natural and social sciences Evolutionism and Its Critics Stephen K.

Sanderson,2015-12-03 Evolutionism and Its Critics is a critical history of evolutionary theories in the social sciences and a defense of them against their many critics Sanderson deconstructs not only the wide array of social evolutionary theories but the criticisms of the antievolutionists Deconstructing evolutionary theories means laying bare their fundamental epistemological methodological conceptual and theoretical assumptions and principles Deconstructing antievolutionism means showing just where and how the critics have for the most part gone wrong But Evolutionism and Its Critics aims to reconstruct as well as deconstruct and does this by building on the shoulders of past giants of evolutionary theorizing a comprehensive evolutionary interpretation of human society based on abundant scientific and historical evidence

Theorizing Modern Society as a Dynamic Process Harry F. Dahms, Lawrence Hazelrigg,2012-10-29 Emphasis is placed in Continental European social theory and on the importance of political analyses to theorizing modern societies This title focuses on dynamic processes that gave way to illuminate structural features of modern social life **The SAGE Handbook**

of Evolutionary Psychology Todd K. Shackelford,2021-08-04 Evolutionary psychology is an important and rapidly expanding area in the life social and behavioral sciences and this Handbook represents the most comprehensive and up to date reference text in the field today Over three volumes the Handbook provides a rich overview of the most important theoretical and empirical work in the field Chapters cover a broad range of topics including theoretical foundations the integration of evolutionary psychology with other life social and behavioral sciences as well as with the arts and the humanities and the increasing power of evolutionary psychology to inform applied fields including medicine psychiatry law and education Each of the volumes has been carefully curated to have a strong thematic focus covering The foundations of evolutionary psychology The integration of evolutionary psychology with other disciplines and The applications of evolutionary psychology The SAGE Handbook of Evolutionary Psychology is an essential resource for researchers graduate students and advanced undergraduate students in all areas of psychology and in related disciplines across the life social and behavioral sciences Criminological Theory Anthony Walsh,2014-09-19 Criminologists can benefit from questioning the underlying assumptions upon which they rest their work Philosophy has the ability to clarify our thoughts inform us of why we think about things the way we do solve contradictions in our thinking we never knew existed and even dissolve some

dichotomies we thought were cast in stone One of those dichotomies is free will vs determinism Criminology must reckon with both free will and agency as posited by some theories and determinism as posited by others including the ever more influential fields of genetics and biosocial criminology Criminological Theory Assessing Philosophical Assumptions examines philosophical concepts such as these in the context of important criminological theories or issues that are foundational but not generally considered in the literature on this topic The uniqueness of this treatment of criminological theory is that rather than reporting what this person or that has said about a particular theory Walsh exposes the philosophical assumptions underlying the theory Students and scholars learn to clarify their own biases and better analyze the implications of a broad range of theories of crime and justice

Red, Black, and Objective Sal Restivo, 2016-04-08 Drawing on the empirical findings generated by researchers in science studies and adopting Kropotkin's concept of anarchism as one of the social sciences Red Black and Objective expounds and develops an anarchist account of science as a social construction and social institution Restivo's account is at once normative analytical organizational and policy oriented in particular with respect to education With attention to the social practices and discourse of science this book engages with the works of Feyerabend and Nietzsche as well as philosophers and historians of objectivity to ground an anarchistic sociology of science Marx and Durkheim figure prominently in this account as precursors of the contemporary science studies perspective on the perennial question What is science The result is an approach to understanding the science and society nexus that is at once an extension of Restivo's earlier work and a novel adaptation of the anarchist agenda Red Black and Objective is an exploration by one of the founders of the science studies movement of questions in theory practice values and policy As such it will appeal to those with interests in science and technology studies social theory and sociology and philosophy of science and technology

Emerging Adulthood in Hong Kong Chau-kiu Cheung, 2017-09-22 How emerging adults broadly referring to those aged from 18 to 29 years old fare in civic engagement as compared with other adults is the focus of the present work The work takes civic engagement to comprise prosociality in civil society sustaining social institutions and challenging institutions Delineating a theoretical framework based on voluntaristic theory the work expects to find differences in civic engagement due to the voluntaristic mechanisms of power realization utilitarian optimization normative conformity and idealistic consistency maintenance in the emerging adult as compared with the other Using survey data from 25 878 Chinese adults in Hong Kong the work illustrates that the emerging adult is higher than is the other in challenging social institutions notably in terms radicalism and occupying protest Moreover the emerging adult is less prosocial in terms in community participation Meanwhile the emerging adult is not consistently different from the other in sustaining social institutions The findings are crucial given the control various background characteristics including age education marriage and employment These findings are therefore useful for illustrating social forces postulated in voluntaristic theory for explaining civic engagement

Evolutionary Social Sciences Manfred Hammerl, Sascha Schwarz, Kai P. Willführ, 2025-08-02

In many social science disciplines the potential of Darwinian evolution theory has now been recognized and this reception has often led to the emergence of new fields of research For example Evolutionary Psychology Evolutionary Sociology and Evolutionary Demography have established themselves as independent disciplines and can be summarized as Evolutionary Social Sciences Selected concepts and application areas of the Evolutionary Social Sciences are addressed in this book It invites readers on an interdisciplinary tour that spans disciplines such as psychology sociology family studies behavioral genetics demography history game theory and archaeology The book is divided into two parts The first part includes contributions that provide an accessible introduction to the research fields and central concepts of the Evolutionary Social Sciences The second part contains contributions that address specific questions from an evolutionary perspective The target audience for the book includes social scientists and students who wish to engage with the evolutionary perspective in the social sciences

Studying Societies and Cultures Lawrence A. Kuznar, Stephen K. Sanderson, 2015-12-03 A thought provoking stimulating volume on the past present and future of cultural materialism that is both laudatory of Harris research strategy and critical of it Paul Shankman University of Colorado One of the most important anthropologists of all time Marvin Harris was influential worldwide as the founder of cultural materialism This book accessibly analyzes Harris's theories and their important legacies today The chapters explore cultural materialism's epistemology and its relation to rational choice theory Darwinian social science and population pressures The authors assess recent attempts to extend and reformulate cultural materialism and highlight cross cultural archaeological and ethnographic applications of cultural materialism today

Social Class and Crime Anthony Walsh, 2010-09-13 Social class has been at the forefront of sociological theories of crime from their inception It is explicitly central to some theories such as anomie strain and conflict and nips aggressively at the periphery of others such as social control theory Yet none of these theories engage in a systematic exploration of what social class is how individuals come to be placed in one rung of the class ladder rather than another or the precise nature of the class crime relationship This book avers that the same factors that help to determine a person's class level also help to determine that person's risk for committing criminal acts Social class is a modern outcome of primordial status striving and requires explanation using the modern tools of genetics neurobiology and evolutionary biology and this is what this book does Many aspects of criminal behavior can be understood by examining the shared factors that lead to the success or failure in the workplace and to pro or antisocial activities A biosocial approach requires reducing sociology's master variable to a lower level analysis to examine its constituent parts which is resisted by many criminologists as highly controversial However this book makes plain that the more we know about the nature side of behavior the more important we find the nurture side to be It makes clear how the class crime relationship and criminology in general can benefit from the biosocial perspective a perspective that many criminological luminaries expect to be the dominant paradigm for the twenty first century

The Routledge Handbook of Research Methods in the Study of Religion Steven Engler, Michael Stausberg, 2021-11-29 This

substantially revised second edition of The Routledge Handbook of Research Methods in the Study of Religion remains the only comprehensive survey in English of methods and methodology in the discipline Designed for non specialists and upper undergraduate graduate level students it discusses the range of methods currently available to stimulate interest in unfamiliar methods and enable students and scholars to evaluate methodological issues in research The Handbook comprises 39 chapters 21 of which are new and the rest revised for this edition A total of 56 contributors from 10 countries cover a broad range of topics divided into three clear parts Methodology Methods Techniques The first section addresses general methodological issues including comparison research design research ethics intersectionality and theorizing analysis The second addresses specific methods including advanced computational methods autoethnography computational text analysis digital ethnography discourse analysis experiments field research grounded theory interviewing reading images surveys and videography The final section addresses specific techniques including coding focus groups photo elicitation and survey experiments Each chapter covers practical issues and challenges theoretical bases and their use in the study of religion s illustrated by case studies The Routledge Handbook of Research Methods in the Study of Religion is essential reading for students and researchers in the study of religion s as well as for those in related disciplines **Societies Past and Present**

Thomas C. Burr,2025-09-24 This global and comparative history examines the evolution of human societies over many millennia illuminating patterns within societies today It shows how the original human groups bands of hunter gatherers grew over time into larger and more complex societies through three major transformations settlement and domestication the development of complexity and inequality and industrial globalization The book describes how each of these major changes in economy and political structure created new types of societies villages chiefdoms and other complex societies agrarian states and empires and today s global social system It therefore shows how different types of societies came to co exist and interact on Earth The book compares societies along seven aspects their economies political systems cultural patterns inequalities family structures demographics and environmental patterns It shows that even societies that shared similar basic features still exhibited great variety The comparative framework presented here helps readers develop a conceptual vocabulary for understanding societies the larger social systems within which they exist and the major social changes that led to this continuing expansion **Idol Worship in Chinese Society** Xiaodong Yue,Chau-kiu

Cheung,2018-10-17 This book introduces psychosocial studies of idol worship in Chinese societies It reviews how idol worship is perceived in Chinese culture history and philosophy as well as how it differs from the concept of celebrity worship that is more dominant in Western literature Using a pioneering hexagonal model of idol worship this book explains how idol worship is affected by various demographic and dispositional variables as well as the cognitive and social functions of idols and idol worship Finally it discusses idol worship from a contemporary Chinese perspective including emotional interpersonal and social learning aspects and ends with a discussion of moral development perspective *On Genetic Interests* Frank

Salter,2017-07-28 From an evolutionary perspective individuals have a vital interest in the reproduction of their genes Yet this interest is overlooked by social and political theory at a time when we need to steer an adaptive course through the unnatural modern world of uneven population growth and decline global mobility and loss of family and communal ties In modern Darwinian theory bearing children is only one way to reproduce Since we share genes with our families ethnic groups and the species as a whole ethnocentrism and humanism can be adaptive They can also be hazardous when taken to extremes On Genetic Interests canvasses strategies and ethics for conserving our genetic interests in an environmentally sustainable manner sensitive to the interests of others **Ethical Thought in Increasingly Complex Societies** C.R.

Hallpike,2016-12-09 Ethical Thought in Increasingly Complex Societies Social Structure and Moral Development combines insights of developmental psychology and cultural anthropology to examine the development of moral thinking Drawing on his extensive knowledge of small scale communities of hunter gatherers and farmers in Ethiopia and Papua New Guinea C R Hallpike studies the means by which individual thinking interacts with complex social factors to produce moral ideas and the effects of worldview on ethical systems This book is recommended for scholars of psychology anthropology and philosophy

The Cambridge Handbook of Social Theory: Volume 2, Contemporary Theories and Issues Peter

Kivisto,2020-12-17 This ambitious two volume handbook of social theory consists of forty original contributions The researchers take stock of the state of social theory and its relationship to the canon exploring such topics as the nature purpose and meaning of social theory the significance of the classics the impact of specific individual and theory schools and more Both volumes reflect a mixture of what intellectual historian Morton White distinguished as the annalist of ideas and the analyst of ideas locating theoretical thought within the larger socio historical context that shaped it within the terrain of the sociology of knowledge Exploring the contemporary relevance of theories in a manner that is historically situated and sensitive this impressive and comprehensive set will likely stand the test of time Information Strategy and Warfare John

Arquilla,Douglas A. Borer,2007-09-11 This volume develops information strategy as a construct equal in importance to military strategy as an influential tool of statecraft John Arquilla and Douglas A Borer explore three principal themes the rise of the information domain and information strategy as an equal partner alongside traditional military strategy the need to consider the org

Evolution Of Human Sociality A Darwinian Conflict Perspective Book Review: Unveiling the Power of Words

In some sort of driven by information and connectivity, the ability of words has be much more evident than ever. They have the ability to inspire, provoke, and ignite change.
