History of Modern Experimental Psychology George Mandler, 2011-01-21 The evolution of cognitive psychology traced from the beginnings of a rigorous experimental psychology at the end of the nineteenth century to the cognitive revolution at the end of the twentieth and the social and cultural contexts of its theoretical developments Modern psychology began with the adoption of experimental methods at the end of the nineteenth century Wilhelm Wundt established the first formal laboratory in 1879 universities created independent chairs in psychology shortly thereafter and William James published the landmark work Principles of Psychology in 1890 In A History of Modern Experimental Psychology George Mandler traces the evolution of modern experimental and theoretical psychology from these beginnings to the cognitive revolution of the late twentieth century Throughout he emphasizes the social and cultural context showing how different theoretical developments reflect the characteristics and values of the society in which they occurred Thus Gestalt psychology can be seen to mirror the changes in visual and intellectual culture at the turn of the century behaviorism to embody the parochial and puritanical concerns of early twentieth century America and contemporary cognitive psychology as a product of the postwar revolution in information and communication After discussing the meaning and history of the concept of mind Mandler treats the history of the psychology of thought and memory from the late nineteenth century to the end of the twentieth exploring among other topics the discovery of the unconscious the destruction of psychology in Germany in the 1930s and the relocation of the field s center of gravity to the United States He then examines a more neglected part of the history of psychology the emergence of a new and robust cognitive psychology under the umbrella of cognitive science **Points of View in the Modern**

History of Psychology Claude E. Buxton, 2013-10-22 Points of View in the Modern History of Psychology is a collection of papers that presents each individual contributor s expert knowledge of history in the field of psychology One paper examines Wilhelm Wundt s concept of psychology as the propaedeutic science surviving and inspiring a generation or more of psychologists Another paper discusses the early sources and the basic conceptions of functionalism as used in America John B Watson proclaims behaviorism as a new discipline in psychology with defining features such as an objective deterministic scientific and experimental method that can be used in both human and animal studies Lieberman 1979 Mackenzie 1977 Miller Galanter and Pribram 1960 oppose behaviorism on the grounds that it slights the purpose of psychology and focuses more on methodology to the detriment of theory One paper notes that the acceptance or influence that a point of view has is based in some ways on the range and clarity of its connections with experimental and observational reality This collection can prove useful for psychologists behavioral scientists psychiatrists psycho analysts students of psychology philosophy or general history who are interested in the many viewpoints of psychology The evolution of modern psychology Richard
