Understanding the Evolution of Regional Economic Development and Tourism Efficiency in China Tsung Pao Wu, 2024-07-16 This insightful volume delves into the intricate relationship between economic growth and tourism effectiveness in China's diverse regions. By emphasizing China's unique experiences, the text offers valuable lessons applicable to regions worldwide. **Transitions in Regional Economic Development** Ivan Turok, David Bailey, Jennifer Clark, Jun Du, Ugo Fratesi, Michael Fritsch, John Harrison, Tom Kemeny, Dieter Kogler, Arnoud Lagendijk, Tomasz Mickiewicz, Ernest Miguelez, Stefano Usai, Fiona Wishlade, 2018-10-18 At a time of extraordinary challenges confronting the world, this book analyses some of the profound changes occurring in the development of cities and regions. It discusses the uncertainties associated with the stalling of hyper globalization and asks whether this creates opportunities for resurgent regional economies driven by local capabilities, resource efficiencies, and domestic production. Theory and evidence on socio-economic and environmental transitions underway in many regions are brought together. Implications of the shifting balance of global power towards emerging economies in the East are explored, along with the consequences of urbanization in the global South for politics and democracy. Dilemmas surrounding migration are also discussed, including whether incomers displace local workers and depress wages, or bring benefits in the form of know-how, new technology, and investment. More integrative concepts of the region and theories of regional development are analysed, recognising the role of human capital, knowledge, innovation, finance, infrastructure, and institutions. This was originally published as a special issue of *Regional Studies*.

The Regional World Michael Storper, 1997-10-31 This pioneering volume proposes a compelling new theory of how regions have sustained their economic viability in the era of multinational corporations. Unlike traditional approaches which analyze economic systems in terms of their mechanics, inputs, outputs, prices, technology, etc., this work views them as systems for coordinating human actions and relationships. Reconceptualizing the role of learning, technology, and local institutions in development, Storper illuminates the key role of regional economies as building blocks of the increasingly connected world. A thought-provoking and timely work, *The Regional World* carries resounding implications for educators, students, and policymakers in economic geography, economic sociology, and international business. It is an essential primary or supplementary text for graduate-level courses on economic regional or industrial development and policy, and international business.
